Lab 01: Set Up Microsoft 365 Copilot and Prompt Safely

Topic 01 | Foundation | Microsoft 365 Copilot Chat + Excel | K1 | A1

Goal

Establish the licensed work surface, distinguish work from web grounding and record safe-use controls.

Expected output

Completed setup, grounding and prompt-review register in Excel.

Files

- Lumina-Living-Lab-01.xlsx - learner starter and control workbook
- completed/Lumina-Living-Lab-01-completed.xlsx - completed comparison copy
- LAB-01-Instructions.pdf - printable detailed guide
- Other Office files in this folder are specific to this lab

Primary prompt

Using the attached workbook and only the information it contains, summarise the three highest-priority readiness gaps for Lumina Living. For each gap, cite the sheet and row evidence, state the risk, propose one control, and label anything you cannot verify.

Procedure

1. Sign in with the training account allocated by the trainer and confirm the Microsoft 365 Copilot work surface is available.

Do not paste the password into the workbook, prompt history or screenshots.

2. Open the workbook and review the Readiness_Register table.

Confirm that the fields Owner, Evidence, Risk and Control are present.

3. Select work-grounded context when available and attach the workbook.

If work grounding is unavailable, continue with the attached file and record the limitation.

4. Submit the supplied prompt without adding unsupported company facts.

Using the attached workbook and only the information it contains, summarise the three highest-priority readiness gaps for Lumina Living. For each gap, cite the sheet and row evidence, state the risk, propose one control, and label anything you cannot verify.

5. Verify every cited row and revise any unsupported statement.

Record Pass, Corrected or Not verifiable in Prompt_Review.

6. Save the workbook with your initials and retain one screenshot of the grounded response.

Use the Evidence_Register sheet; do not capture credentials.

Acceptance test

The register identifies the active Copilot surface, grounding source, three evidence-backed gaps and a verification status for every claim.

Evidence

- Completed workbook with Prompt_Log and Evidence_Register
- App-specific artifact and a credential-safe screenshot
- Verification, exception and human-approval note
