Three four-part prompt examples

Lumina Living Pte Ltd | SW-2026 | v8.2

HR policy in Word

Goal: Draft a staff enablement and responsible Copilot use policy for Lumina Living.

Context: You support HR for project SW-2026. The audience is 56 assigned staff and their managers; the launch is 1 October 2026.

Source: Use Lumina-HR-Facts.docx and Lumina-Travel-and-Expenses.docx only. Cite HR-01 or EXP-01 sections.

Expectations: Produce a two-page draft with responsibilities, four-hour training requirement, review and escalation rules, and a staff checklist. Flag missing facts; do not invent leave or pay terms. Label DRAFT FOR HR REVIEW.

Business analysis in Excel

Goal: Identify three evidence-backed findings for the SW-2026 readiness decision and create charts.

Context: Mei needs a management briefing from January-June historical trading data and the 7 September staff-readiness snapshot. October targets are plans, not actual results.

Source: Use Lumina-Business-Data.xlsx: Campaign_Data, Monthly, Channels and HR_Readiness.

Expectations: Use formulas for revenue, cost, margin and completion; create a monthly revenue line chart, channel-margin bar chart and training-completion bar chart. Verify 96 records and 47/56 trained; cite ranges and label assumptions. Carry the checked charts into a one-page Word report.

Marketing presentation and handoff

Goal: Create a six-slide SW-2026 decision presentation, then prepare a consistent team handoff.

Context: The audience is Lumina leadership and HR, Marketing, Finance and Operations leads. They need a launch-readiness decision, not a sales pitch.

Source: Use Lumina-Management-Report.docx, Lumina-HR-Policy.docx and Lumina-Campaign-Brief.docx; use the verified Excel chart data.

Expectations: Show budget SGD 18,000, target 120 enquiries, launch 1 October, verified charts, risks and named decisions. Then draft a 150-word Outlook email, a 120-word Teams update and Loop tasks with unchanged action IDs. Review before a manual sandbox post; do not claim a send or post occurred.
