Lab 02 Draft the cross-department launch brief in Word

Course: TGS-2024043856 | Version: v8.2 | Apps: Word + Excel + Copilot | Alignment: K1 | A1

Company and role

You work for Lumina Living Pte Ltd on SW-2026, the Sustainable Workspace Launch. HR, Marketing, Finance and Operations share one evidence trail. Launch is planned for 1 October 2026; budget SGD 18,000; target 120 qualified enquiries. Your role in this lab is Project brief.

Input and handoff

Use Lumina-Company-Brief.docx; Lumina-Campaign-Brief.docx. Prefer your prior-lab output. The scenario folder provides a supplied fallback so this lab can run independently. Save your work in your own SW-2026 folder and record whether you used your own output or a supplied example.

Use Lumina-Living-Lab-02.xlsx as the evidence workbook. completed/ contains comparison examples, not proof that your action ran. The primary app output is Lumina-Launch-Brief.docx.

Four-part prompt

Goal: Create a two-page launch brief with objectives, owners, dates, dependencies, HR training and business evidence needs. Cite the supplied source sections and identify unresolved questions.

Context: You work for Lumina Living Pte Ltd on SW-2026, the Sustainable Workspace Launch. HR, Marketing, Finance and Operations share one evidence trail. Launch is planned for 1 October 2026; budget SGD 18,000; target 120 qualified enquiries.

Source: Lumina-Company-Brief.docx; Lumina-Campaign-Brief.docx. Use your own reviewed prior-lab files first; scenario/ contains supplied fallback examples.

Expectations: Save Lumina-Launch-Brief.docx. Record source version, verified facts, unresolved questions and reviewer in Lumina-Living-Lab-02.xlsx. Keep project SW-2026 and action IDs A01-A04 unchanged. Label every output Draft until reviewed; record actual app actions separately.

Procedure

1. Open Word and save a new Lumina-Launch-Brief.docx in your personal project folder. Open Copilot and select the reference-file control or attach the named sources available in your tenant.

2. Use the four-part prompt. If file referencing is unavailable, paste the relevant source excerpts with filenames and section labels.

3. Check budget, enquiry target, launch date and the four owners against the brief. Add a Dependencies section linking HR training, business analysis and Operations readiness.

4. Save the draft and source/evidence links. This Word brief becomes the narrative input to Lab 4.

Acceptance and next handoff

The output belongs to Lumina SW-2026; the named sources support its facts; the reviewer and source version are recorded; and Lumina-Launch-Brief.docx is available to the next activity. Check each step’s numerical or behavioral expectation. A draft is not a sent email, a posted Teams message or an executed flow.

Marketing and strategy handoff

Complete the corresponding steps in GROUNDED-RESEARCH.md, included in this folder. Use the local scenario source pack and prepared reports; save your own cited marketing/strategy outputs for the final deck and communication handoff.
