Lab 09 Draft the launch review email in Outlook

Course: TGS-2024043856 | Version: v8.2 | Apps: Outlook + Excel + Copilot | Alignment: K2 | A3

Company and role

You work for Lumina Living Pte Ltd on SW-2026, the Sustainable Workspace Launch. HR, Marketing, Finance and Operations share one evidence trail. Launch is planned for 1 October 2026; budget SGD 18,000; target 120 qualified enquiries. Your role in this lab is Cross-department communication.

Input and handoff

Use Lumina-Management-Report.docx; Lumina-HR-Policy.docx; Lumina-Decision-Deck.pptx. Prefer your prior-lab output. The scenario folder provides a supplied fallback so this lab can run independently. Save your work in your own SW-2026 folder and record whether you used your own output or a supplied example.

Use Lumina-Living-Lab-09.xlsx as the evidence workbook. completed/ contains comparison examples, not proof that your action ran. The primary app output is Lumina-Outlook-Draft.txt.

Four-part prompt

Goal: Draft a 150-word review email to the trainer-assigned reviewers. Include the launch decision, readiness gap, A01-A04 owners/dates and reviewed artifact links. Save as a draft; check recipients, links and figures before any manual sandbox send.

Context: You work for Lumina Living Pte Ltd on SW-2026, the Sustainable Workspace Launch. HR, Marketing, Finance and Operations share one evidence trail. Launch is planned for 1 October 2026; budget SGD 18,000; target 120 qualified enquiries.

Source: Lumina-Management-Report.docx; Lumina-HR-Policy.docx; Lumina-Decision-Deck.pptx. Use your own reviewed prior-lab files first; scenario/ contains supplied fallback examples.

Expectations: Save Lumina-Outlook-Draft.txt. Record source version, verified facts, unresolved questions and reviewer in Lumina-Living-Lab-09.xlsx. Keep project SW-2026 and action IDs A01-A04 unchanged. Label every output Draft until reviewed; record actual app actions separately.

Procedure

1. Open a new Outlook email in HTML format and choose Draft with Copilot if available. Keep the recipient fields blank while generating.

2. Reference your reviewed report, HR policy and decision deck; use the four-part prompt. Use the supplied text only as an illustrative fallback.

3. Check all numbers, dates, links and A01-A04 against the workbook. Replace fictional role names in the recipient field with the trainer-assigned sandbox accounts only.

4. Save the email to Drafts. Capture its draft status and record the actual draft link or screenshot. A manual send is optional only when the trainer assigns the destination; record a sent item only if it exists.

Acceptance and next handoff

The output belongs to Lumina SW-2026; the named sources support its facts; the reviewer and source version are recorded; and Lumina-Outlook-Draft.txt is available to the next activity. Check each step’s numerical or behavioral expectation. A draft is not a sent email, a posted Teams message or an executed flow.

Include links to the reviewed Lumina-Marketing-Report.docx and Lumina-Strategy-Report.docx in this handoff. The scenario folder contains labelled samples if your own reports are unavailable. Keep report versions and action IDs

consistent.
