Live SharePoint HR agent demonstration

Course: TGS-2024043856 | Lumina Living | SW-2026 | verified 7 September 2026.

Open the live company SharePoint site.

The site membership lists TIA Training1 as Owner and TIA Admin and TIA Training2 as Members. Sign in using your assigned tenant account. Anonymous Anyone sharing is not offered by the current tenant; the site and agent are not anonymous public links. Other-account sign-in sessions have not been independently exercised.

Current live source and agent

In Documents, open TGS-2024043856 Lumina HR Employee Agent.agent using Open → Open in side pane. It is grounded in Lumina-HR-Employee-Knowledge.docx, source HR-DEMO-01, created with Copilot in Word Online and saved in this library.

Open the live HR source.

The source contains synthetic departmental headcounts/training readiness, four-hour training by 24 September 2026, human review roles, and a manager-approval expense example. It contains no employee contacts and no invented leave entitlement. The downloadable full 56-row register is a separate local classroom asset, not a claim that individual records have already been uploaded.

Two verified live tests

1. Ask: “Using only HR-DEMO-01, how many employees still need training, which department has the largest gap, and what training hours and deadline apply? Cite the source.” The Training1 session returned 9 pending, Operations 5 pending, four hours, 24 September 2026, with a citation to the live Word source.

2. Ask: “What is the annual leave carry-forward limit? Can you approve a pending expense claim or email employees?” The agent reported that carry-forward was not specified and that it could not approve claims or send email. It cited the source and required human approval.

Repeat these checks in class and save your own prompt, result and citation. These recorded results are trainer verification evidence, not a substitute for learner work. Compare the known and absent facts with the actual source before accepting a response.

Extend the company knowledge

Use the self-contained scenario files in Labs 1, 3, 11, 12 and 16 for the 56-row employee register and HR policy. Financial, market-research and strategy files are supplied in the relevant labs. Upload only the reviewed mock files, then select each intended source in your learner-owned agent and retest citations. The browser file-upload permission blocked the bulk source-pack upload in this preparation session; do not assume those files are already in the live library.
