COPILOT

WSQ COURSE SLIDES

Enhance Work Productivity with Microsoft 365 Copilot

Course Code: TGS-2024043856

Digital Technology Adoption and Innovation · ACC-ICT-4004-1.1

Trainer: Dr Alfred Ang

Tertiary Infotech Academy Pte Ltd · UEN 201200696W

Version v8.2 · 7 September 2026

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved.

Digital Attendance (Mandatory)

1

AM and PM

Complete SSG digital attendance for both training days.

2

Assessment

Take the separate assessment attendance before the papers.

3

Scan

Use the QR code shown by the trainer or administrator.

4

Eligibility

Maintain at least 75% attendance.

NAMED TRAINER

About the Trainer

Dr Alfred Ang

Principal Trainer · Tertiary Infotech Academy

ROLE	Principal Trainer and Chief Instructional Designer
EXPERTISE	Microsoft 365, AI, automation and business productivity
CERTIFICATION	ACLP-certified adult educator
DELIVERS	WSQ and professional technology programmes
EXPERIENCE	Cross-industry transformation and workforce training
CONTACT	enquiry@tertiaryinfotech.com

LEARNER INTRODUCTION

Let's Know Each Other

1. **Your work**
   Role, organisation and recurring knowledge work.

2. **Your M365 baseline**
   Word, PowerPoint, Excel, Outlook, Teams and Loop.

3. **Your friction**
   One task that is slow, repetitive or inconsistent.

4. **Your outcome**
   What you want to improve safely over two days.

© 2026 Tertiary Infotech Academy Pte Ltd

HOUSEKEEPING

Ground Rules

1. **Be present**
   Return from breaks on time and complete attendance.

2. **Participate**
   Ask, test and explain your reasoning.

3. **Respect**
   One conversation; critique ideas, not people.

4. **Protect data**
   Use only the supplied synthetic company files.

5. **Verify**
   Copilot output is a draft until evidence is checked.

6. **Human control**
   Do not send, publish or approve automatically.

© 2026 Tertiary Infotech Academy Pte Ltd

TWO-DAY JOURNEY

Course Outline

Day 1

- Copilot foundations and prompting
- Word drafting and policy refinement
- PowerPoint stories and native charts
- Excel formulas, deep analysis and forecasting

Day 2

- Outlook triage and controlled drafts
- Teams meeting intelligence
- Loop implementation and training
- Copilot agents and governed pipelines

Evidence

- 16 progressive lab folders
- An Excel workbook in every lab
- Detailed prompts in LG and activities
- Final pipeline pilot and handover

© 2026 Tertiary Infotech Academy Pte Ltd

SCHEDULE

Lesson Plan — 2 Days

DAY 1

1. 9:00–10:25 · Foundations and safe prompting
2. 10:35–12:30 · Word workflows
3. 1:15–3:10 · PowerPoint storytelling
4. 3:20–6:00 · Excel analysis and forecasting

DAY 2

1. 9:00–10:45 · Outlook and Teams
2. 10:55–12:30 · Loop and transition planning
3. 1:15–4:00 · Agents and governed pipelines
4. 4:00–6:00 · WA and PP assessment

© 2026 Tertiary Infotech Academy Pte Ltd

WHAT YOU WILL ACHIEVE

Learning Outcomes

1

LO1

Predict and mitigate challenges in integrating Microsoft 365 Copilot into a workflow.

2

LO2

Develop a plan for implementing Microsoft 365 Copilot and transitioning from a legacy workflow.

3

LO3

Evaluate productivity opportunities across Teams, Outlook and Microsoft 365 Copilot Chat.

4

LO4

Design a staff enablement plan and a governed Copilot agent pipeline.

© 2026 Tertiary Infotech Academy Pte Ltd

Skills Framework Alignment

1

K1
Relevant systems and software

2

K2
Organisation processes

3

K3
Systems transition process

4

K4
Emerging technology trends including artificial intelligence and automation

5

A1–A4
Transition, opportunity evaluation and staff enablement abilities are practised across the 16 labs.

© 2026 Tertiary Infotech Academy Pte Ltd

BEFORE ASSESSMENT

Briefing for Assessment

1. **Individual work**
   No discussion or sharing during either paper.

2. **Open book**
   Use the slides, Learner Guide and approved materials only.

3. **Devices**
   Place phones and unrelated materials under the table.

4. **Evidence**
   Submit your own files, screenshots and explanation.

5. **Integrity**
   No photos, recording or verbatim copying.

6. **Support**
   Re-assessment and appeal arrangements are available.

© 2026 Tertiary Infotech Academy Pte Ltd

FINAL ASSESSMENT

Assessment and Funding

1

Written Assessment (WA/SAQ)

4 open-ended questions, 60 minutes, open book.

2

Practical Performance (PP)

4 connected Microsoft 365 tasks, 60 minutes, open book.

3

Outcome

Competent (C) or Not Yet Competent (NYC).

4

A minimum of 75% attendance and a Competent assessment outcome are required.

ASSESSMENT DAY

Assessment Flow

© 2026 Tertiary Infotech Academy Pte Ltd

COURSE REPOSITORY

Access the Hands-On Activities

Option A · Clone

- Use Git to clone the repository
- Open the numbered activity folder
- Start with the Excel workbook in the folder

Option B · Download ZIP

- GitHub > Code > Download ZIP
- Extract the full activities tree
- Keep output inside its activity folder

Activity discipline

- Use the LG for detailed procedures
- Verify evidence before acceptance
- Retain screenshots without credentials

https://github.com/tertiarycourses/TGS-2024043856-Enhance-Work-Productivity-with-Microsoft-365-Copilot

© 2026 Tertiary Infotech Academy Pte Ltd

CLASSROOM ACCESS

Microsoft 365 Training Accounts

Training account 1

- training1-tertiary@outlook.com
- Password issued by trainer
- Do not save in prompts or screenshots

Training account 2

- training2-tertiary@outlook.com
- Password issued by trainer
- Sign out at the end of class

Safe handling

- Use only the assigned account
- Do not change recovery settings
- Report access issues to the trainer

© 2026 Tertiary Infotech Academy Pte Ltd

Download Course Material

1 · Sign in

- Open the LMS/TMS portal
- Use your learner account
- Select this TGS course

2 · Download

- Open Courseware
- Download slides and Learner Guide
- Save beside the activities folder

https://lms-tms.tertiaryinfotech.com/

3 · Verify

- Check course code and version
- Use the current release
- Ask the trainer if a file differs

© 2026 Tertiary Infotech Academy Pte Ltd

01

TOPIC 01

Microsoft 365 Copilot Foundations, Word and PowerPoint

Grounding · responsible use · prompt design · drafting · presentation storytelling

© 2026 Tertiary Infotech Academy Pte Ltd

ALIGNMENT K1 · A1

Key Concepts — Microsoft 365 Copilot Foundations, Word and PowerPoint

1

Grounding

Copilot combines the prompt with permitted work or web context; access permissions still apply.

2

Prompt contract

State goal, context, source and expectations, then verify before using the result.

3

Human accountability

Copilot proposes; the user checks evidence, tone, sensitivity and final release.

4

Cross-app story

Word shapes the narrative, Excel supplies evidence and PowerPoint communicates the decision.

5

Responsible AI

Fairness, reliability, privacy, inclusiveness, transparency and accountability guide use.

6

Transition risk

Licensing, data quality, permissions, adoption and over-trust need explicit controls.

© 2026 Tertiary Infotech Academy Pte Ltd

Microsoft 365 Copilot is a work system

CONCEPT

1. Interface: Chat and app experiences accept natural-language goals.
2. Model: Large language models generate and transform content.

CONTROL / DECISION

1. Graph: Permitted work context can ground responses.
2. Apps: Word, PowerPoint, Excel, Teams and Outlook embed task-specific assistance.

© 2026 Tertiary Infotech Academy Pte Ltd

Work-grounded versus web-grounded

Work

- Uses organisational content the signed-in user can access.

Web

- Uses public web information and may require external verification.

File

- An attached file provides bounded task context.

© 2026 Tertiary Infotech Academy Pte Ltd

Permissions remain the boundary

1

Existing access — Copilot should respect the user's underlying permissions.

2

Oversharing — Poorly governed sites can expose too much context.

3

Least privilege — Remove unnecessary access before scaling Copilot.

4

Review — Test representative roles and sensitive searches.

© 2026 Tertiary Infotech Academy Pte Ltd

Four-part prompting framework

1. **Goal**
   State the outcome or decision needed.

2. **Context**
   Explain audience, situation and constraints.

3. **Source**
   Name the files, meetings or data to use.

4. **Expectations**
   Specify format, tone, length and quality checks.

© 2026 Tertiary Infotech Academy Pte Ltd

GOAL · CONTEXT · SOURCE · EXPECTATIONS

Example 1 · HR policy in Word

1

Goal

Draft Lumina’s staff enablement policy.

2

Context

SW-2026 launch; 56 staff and their managers; HR owns training.

3

Source

Lumina-HR-Facts.docx and the EXP-01 expense policy.

4

Expectations

Two-page draft, four-hour training, responsibilities and checklist. Cite sections; flag missing leave/pay terms.

© 2026 Tertiary Infotech Academy Pte Ltd

Example 2 · Excel business evidence

1

Goal

Find three supported insights and create management charts.

2

Context

Jan–Jun trading history plus the 7 September HR-readiness snapshot.

3

Source

Lumina-Business-Data.xlsx: Campaign_Data, Monthly, Channels, HR_Readiness.

4

Expectations

Formula checks; revenue, margin and completion charts. Verify 96 records and 47/56 trained; transfer checked findings to Word.

© 2026 Tertiary Infotech Academy Pte Ltd

Example 3 · Presentation and handoff

1

Goal

Create the launch decision deck and consistent team updates.

2

Context

HR, Marketing, Finance and Operations need a readiness decision.

3

Source

Reviewed management report, HR policy, campaign brief and Excel charts.

4

Expectations

Six slides; editable charts; draft Outlook email; reviewed Teams update; the same Loop actions A01–A04. Record actual delivery evidence.

© 2026 Tertiary Infotech Academy Pte Ltd

SW-2026 carries one evidence trail across apps

1. HR facts → Word policy
2. Excel → charts → Word report
3. PowerPoint → Outlook draft
4. Teams → shared Loop actions

© 2026 Tertiary Infotech Academy Pte Ltd

LUMINA LIVING · FICTIONAL TRAINING COMPANY

One company, one connected evidence trail

SW-2026 workspace launch

HR: 56 staff; 47 trained

Finance: 96 sales summaries

Marketing: SGD 18,000 plan

Operations: service readiness

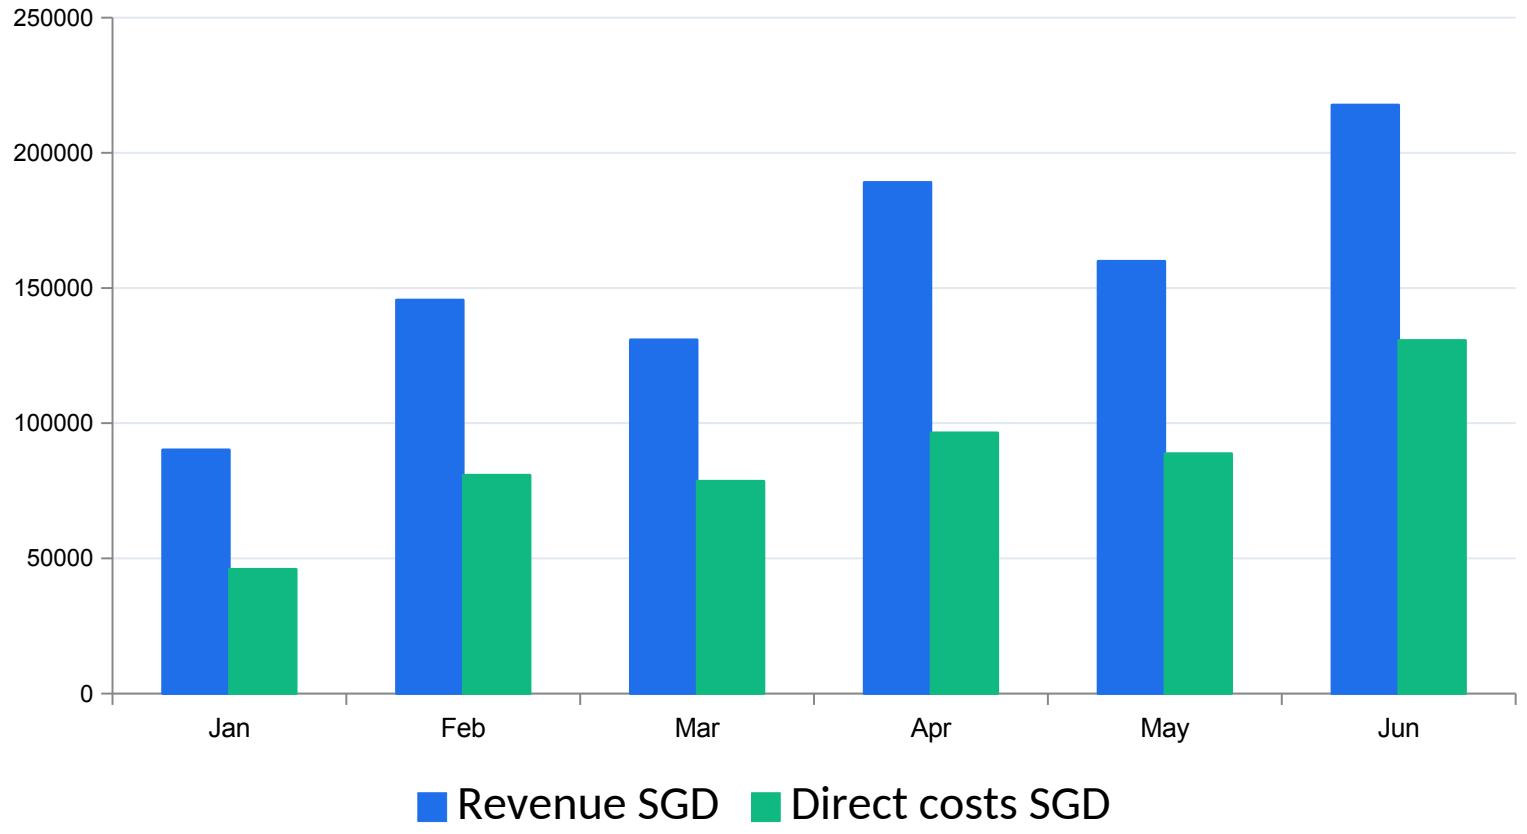

Word → Excel → PPT → Outlook → Teams → Loop

AI-generated illustrative workplace; company data is synthetic.

© 2026 Tertiary Infotech Academy Pte Ltd

LUMINA FINANCE · MONTHLY_FINANCE B2:C7 · SYNTHETIC JAN–JUN 2026

Sales revenue and cost tell different stories

DECISION LENS

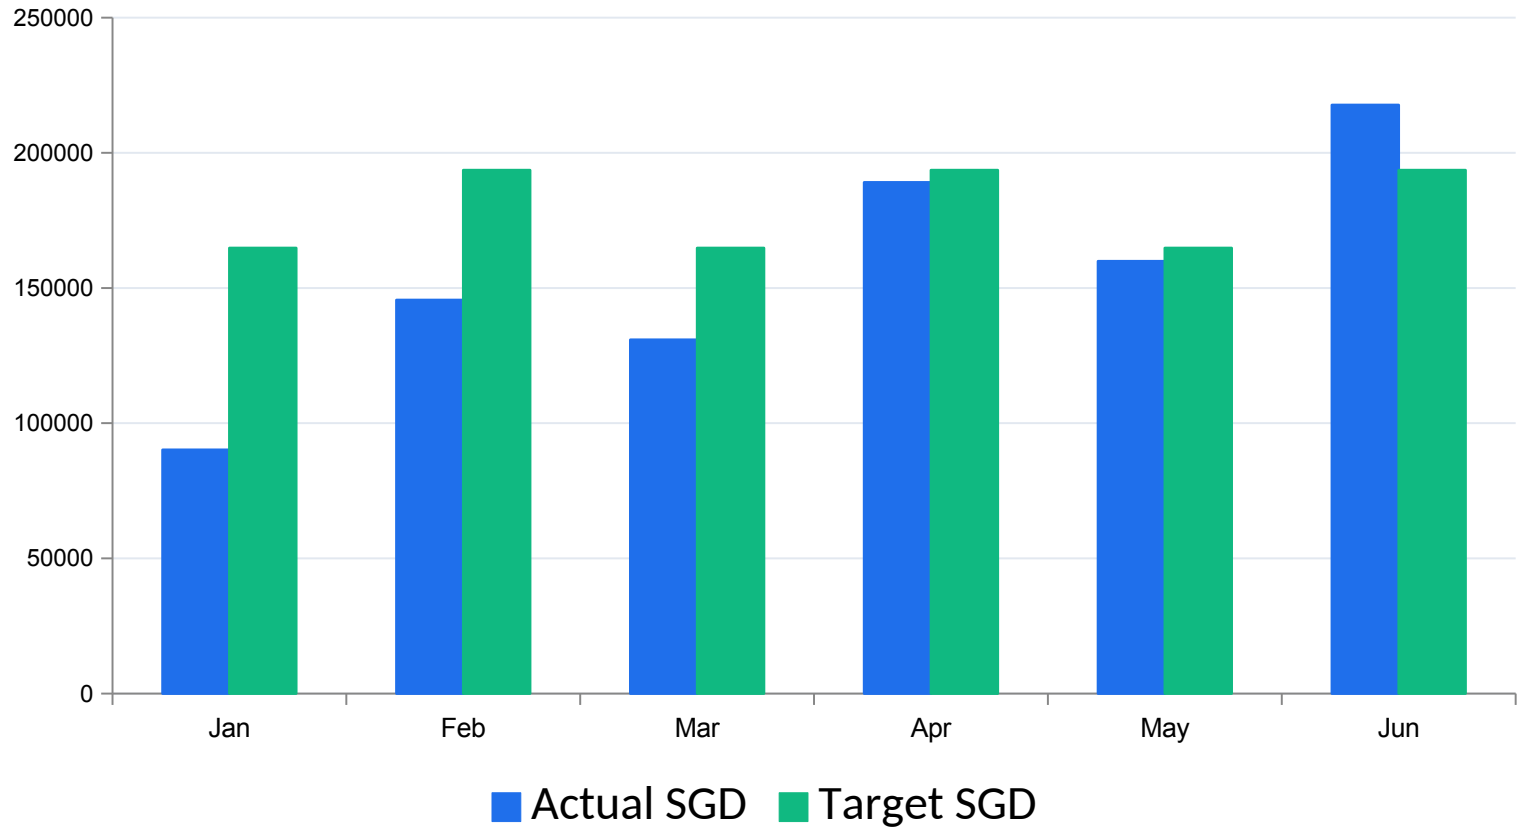

Revenue SGD 933,290; direct costs SGD 521,097.41. Verify the gap before reuse.

Native PowerPoint chart · editable data · verify source and units

© 2026 Tertiary Infotech Academy Pte Ltd

LUMINA FINANCE · MONTHLY_FINANCE B2:B7 / E2:E7

Targets require a separate comparison

DECISION LENS

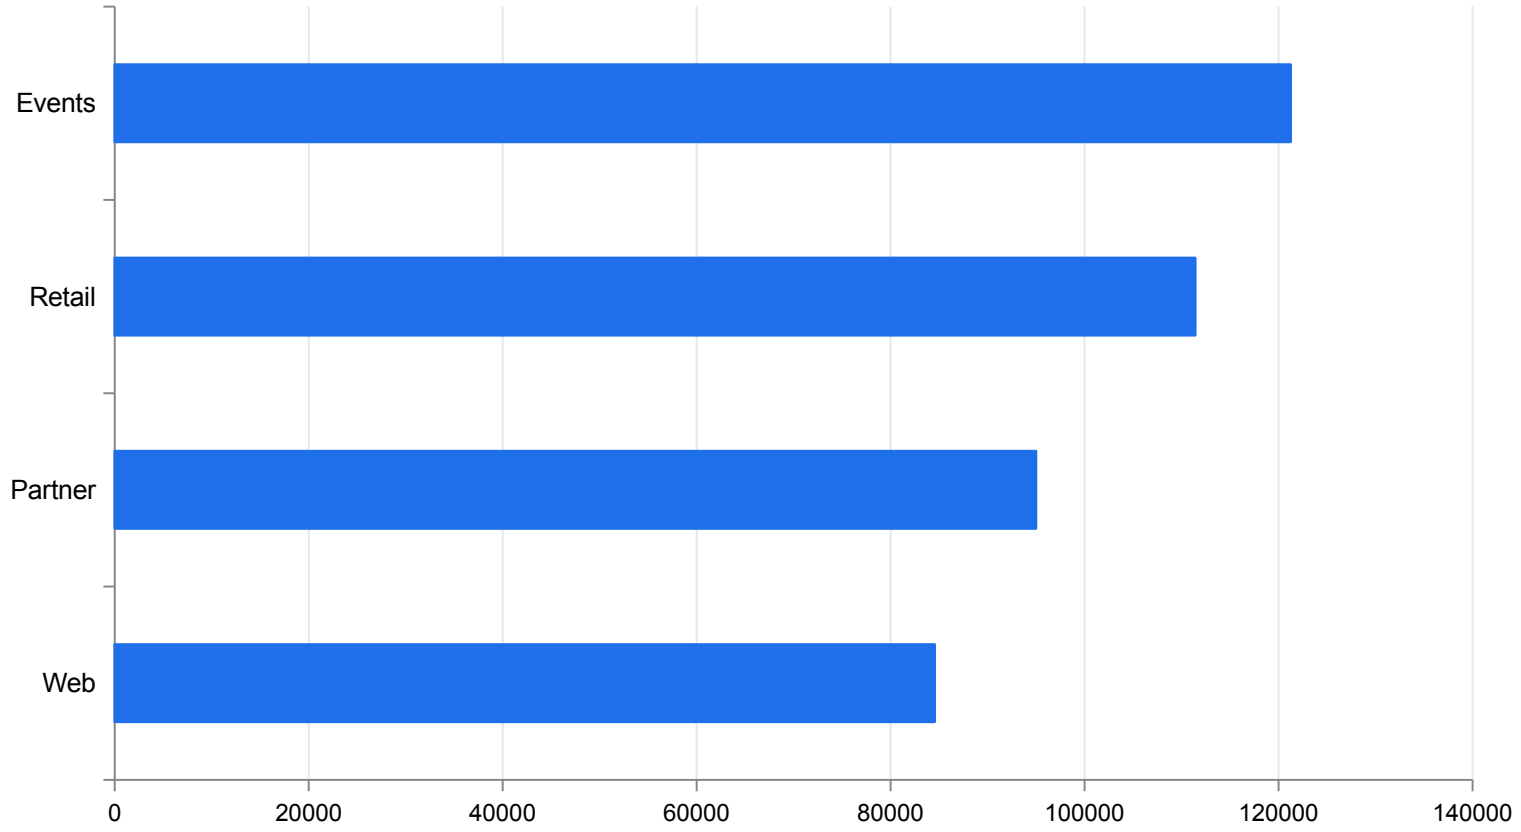

Compare actual sales with synthetic targets; a gap is evidence, its cause is a hypothesis.

Native PowerPoint chart · editable data · verify source and units

© 2026 Tertiary Infotech Academy Pte Ltd

LUMINA FINANCE · CHANNEL_FINANCE A2:D5 · NOT NET PROFIT

Events contributes the largest margin

DECISION LENS

SGD 121,247.22 from Events. Absolute margin does not prove incremental marketing ROI.

Native PowerPoint chart · editable data · verify source and units

© 2026 Tertiary Infotech Academy Pte Ltd

Grounded research separates evidence from inference

1

Internal facts

Sales ledger, HR-01 and CAM-2026Q4 define Lumina's fictional baseline.

2

External context

WEB-01/02/03: IMDA adoption and retail guidance; check publication and observation dates.

3

Inference

Propose an event/web experiment. General policy context does not prove demand or ROI.

4

Decision evidence

Report → cited recommendation → editable charts → reviewed presentation.

© 2026 Tertiary Infotech Academy Pte Ltd

Copilot turns reviewed reports into a decision deck

1. Reviewed Word report
2. Copilot outline + theme
3. Editable financial charts
4. Verify slides + notes + PDF

© 2026 Tertiary Infotech Academy Pte Ltd

Open the live Lumina company knowledge site

1

Employee data

HR-DEMO-01: readiness for 56 synthetic staff. Full 56-row register supplied in the labs.

2

HR policies

Live HR-DEMO-01: training, review roles and expense example. EXP-01: detailed travel rules.

3

Agent demonstration

Open the saved HR Employee Agent. Compare a cited readiness answer with an absent leave-policy fact.

4

Access

Admin, training1 and training2 are members. Site and agent access require tenant sign-in.

[Open TGS-2024043856-LuminaCopilot]

© 2026 Tertiary Infotech Academy Pte Ltd

Prompting is an iterative control loop

CONCEPT

1. Draft: Start with a complete task contract.
2. Inspect: Check facts, omissions and ambiguity.

CONTROL / DECISION

1. Refine: Add constraints or request alternatives.
2. Verify: Compare with authoritative evidence before release.

© 2026 Tertiary Infotech Academy Pte Ltd

Responsible AI in daily work

Fairness

- Check whether wording or recommendations disadvantage groups.

Reliability

- Test important outputs and edge cases.

Privacy

- Use approved data, surfaces and retention rules.

© 2026 Tertiary Infotech Academy Pte Ltd

Common transition risks

1. Licensing — Capabilities differ by plan, tenant and rollout.
2. Data — Weak source quality produces fluent but unreliable outputs.
3. Process — Automating an unclear process accelerates confusion.
4. Adoption — Users need role-based practice, support and feedback.

© 2026 Tertiary Infotech Academy Pte Ltd

Word Copilot across the document lifecycle

1

Draft

Create structured content from a prompt and sources.

2

Transform

Rewrite, shorten, expand or change tone.

3

Interrogate

Ask questions about the current document.

4

Review

Use human fact, policy and audience checks.

© 2026 Tertiary Infotech Academy Pte Ltd

PowerPoint Copilot across the story lifecycle

CONCEPT

1. Plan: Start from audience, decision and source evidence.
2. Create: Generate an outline or deck from a document.

CONTROL / DECISION

1. Refine: Reorganise, rewrite and improve visual hierarchy.
2. Prepare: Draft notes and anticipate audience questions.

© 2026 Tertiary Infotech Academy Pte Ltd

A presentation is an evidence story

Context

- Why the issue matters now.

Insight

- What the evidence reveals.

Choice

- What options or trade-offs exist.

© 2026 Tertiary Infotech Academy Pte Ltd

Native charts preserve trust

1. Editable — Data and labels can be checked and updated.
2. Traceable — Values link to an embedded chart data table.
3. Accessible — Titles, labels and alt text improve interpretation.
4. Honest — Avoid 3D distortion, false precision and missing units.

© 2026 Tertiary Infotech Academy Pte Ltd

Human review before release

1. **Facts**
   Verify numbers, names, dates and citations.

2. **Tone**
   Match audience and organisational voice.

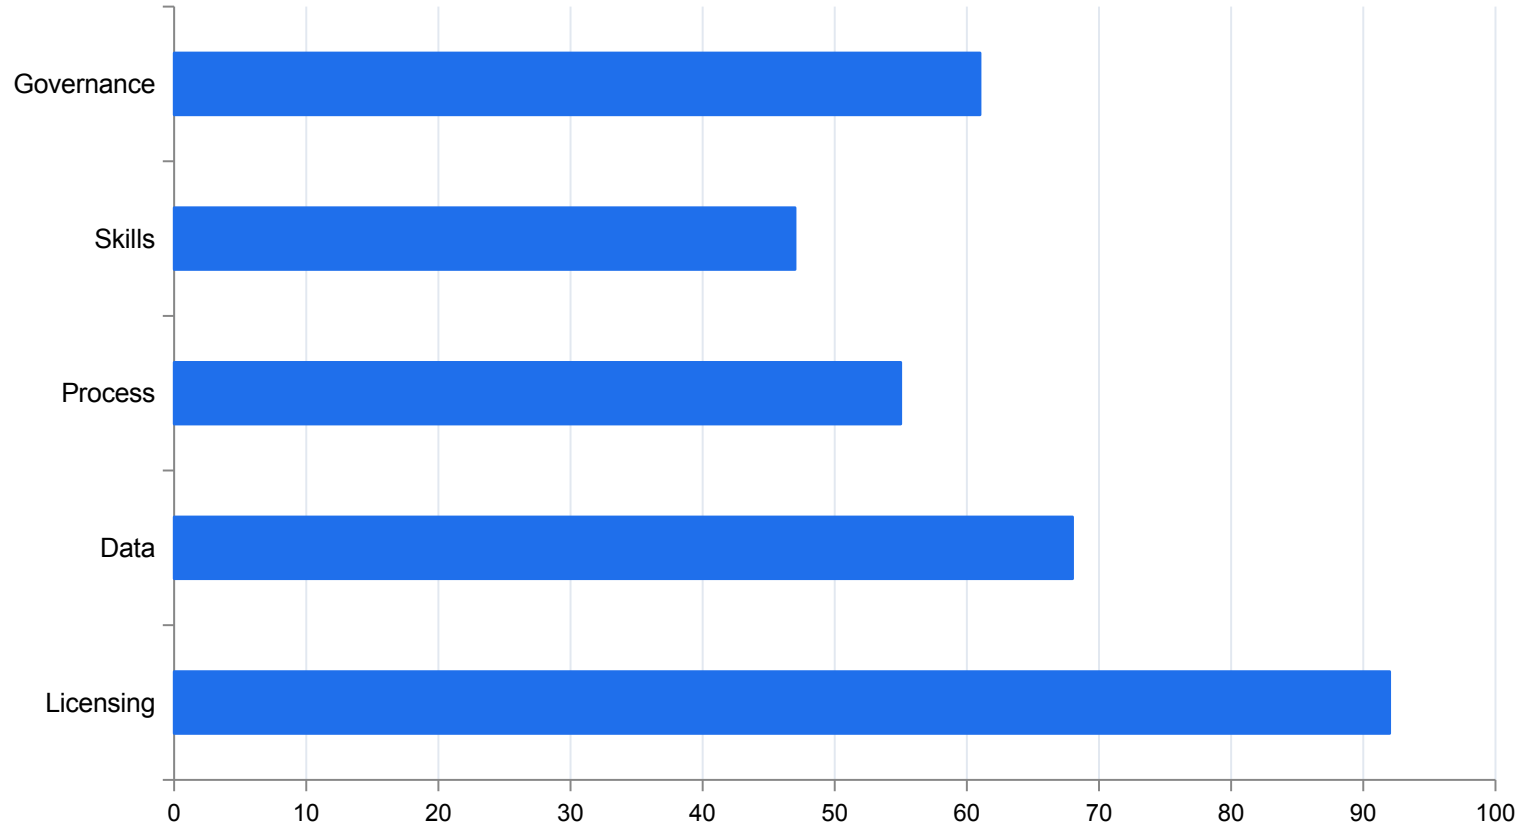

3. **Sensitivity**
   Check confidential content and metadata.

4. **Decision**
   A named owner approves the final document or deck.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 01 · NATIVE CHART

Adoption readiness is uneven

DECISION LENS

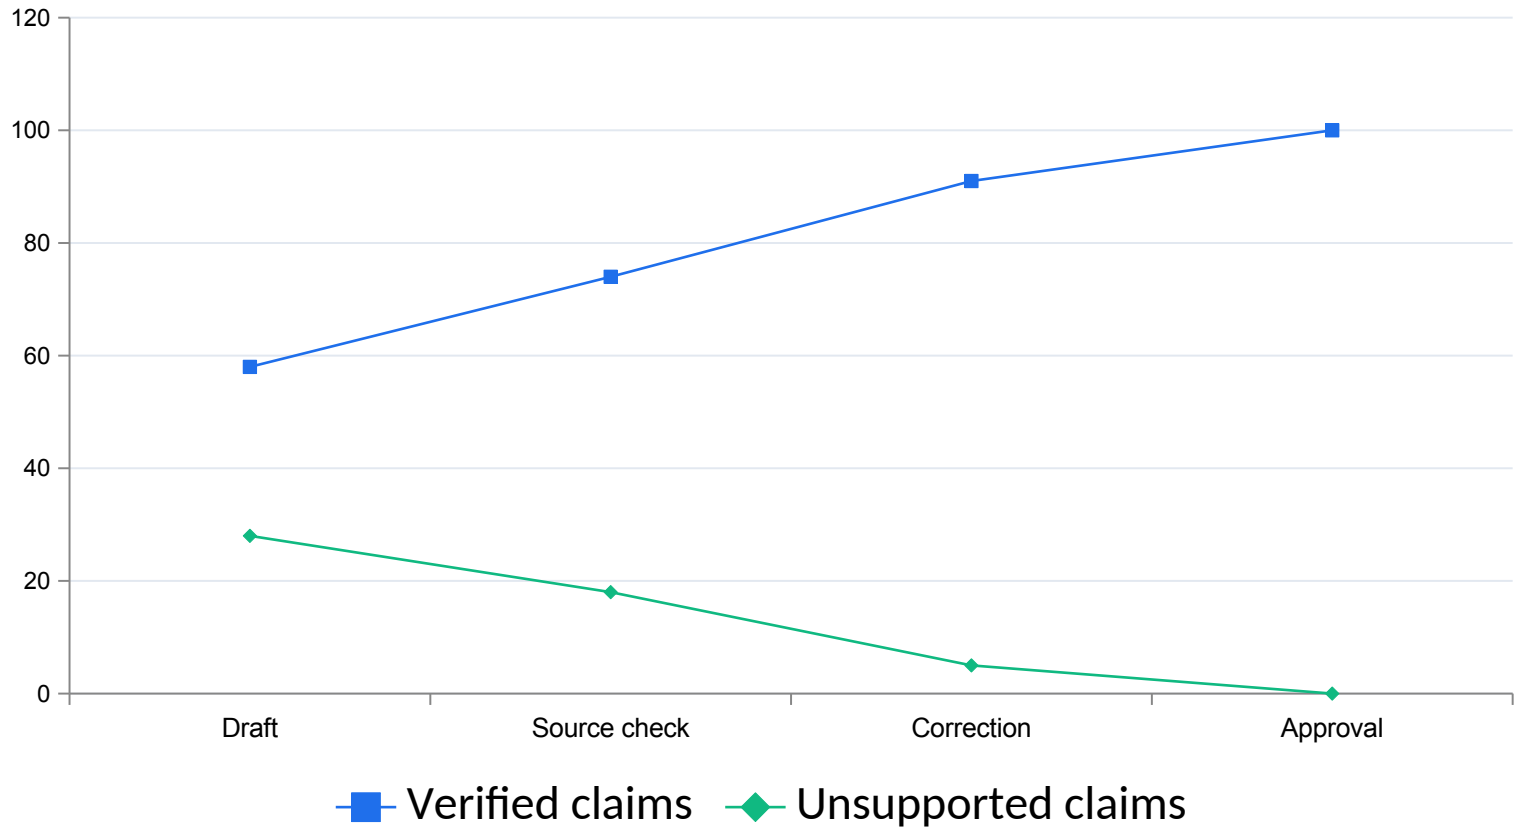

Clustered bars expose the control gap before rollout.

Native PowerPoint chart · editable data · verify source and units

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 01 · NATIVE CHART

Evidence improves after a prompt-review loop

DECISION LENS

Verified claims rise as unsupported statements are corrected.

Native PowerPoint chart · editable data · verify source and units

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 01 · FOUNDATION

Set up the Lumina project and compare prompts

LAB 01

Identify the project objective, four department owners, source authority and missing facts. Compare a vague prompt with a complete Goal–Context–Source–Expectations prompt.

EXPECTED OUTPUT

Save SW-2026-Source-Register.xlsx with reviewed source evidence and your own Copilot prompt/result.

TOOLS Microsoft 365 Copilot Chat + Excel

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 01 · ACCEPTANCE

Set up the Lumina project and compare prompts

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 1 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 01 · FOUNDATION

Draft the cross-department launch brief in Word

LAB 02

Create a two-page launch brief with objectives, owners, dates, dependencies, HR training and business evidence needs. Cite the supplied source sections and identify unresolved questions.

EXPECTED OUTPUT

Save Lumina-Launch-Brief.docx with reviewed source evidence and your own Copilot prompt/result.

TOOLS Word + Excel + Copilot

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 02 · ACCEPTANCE

Draft the cross-department launch brief in Word

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 2 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 01 · INTERMEDIATE

Create and review the HR policy in Word

LAB 03

Create a two-page staff enablement policy with four-hour training, responsible use, review, escalation and a staff checklist. Do not invent leave, salary or remote-working entitlements. Label DRAFT FOR HR REVIEW.

EXPECTED OUTPUT

Save Lumina-HR-Policy.docx with reviewed source evidence and your own Copilot prompt/result.

TOOLS Word + Excel + Copilot

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 03 · ACCEPTANCE

Create and review the HR policy in Word

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 3 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

Generate the leadership presentation from Word

LAB 04

Create six slides: launch decision, business evidence needed, HR readiness, campaign plan, risks and actions. Leave quantitative historical charts for the verified data handoff in Labs 5–8. Preserve source references in notes.

EXPECTED OUTPUT

Save Lumina-Leadership-Draft.pptx with reviewed source evidence and your own Copilot prompt/result.

TOOLS PowerPoint + Word + Excel + Copilot

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 04 · ACCEPTANCE

Generate the leadership presentation from Word

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 4 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 01 · INTERMEDIATE

Add Excel visualizations to Word and PowerPoint

LAB 05

Use the Monthly, Channels and HR_Readiness tables to produce three charts. Add them to the Word report and the presentation. Keep PowerPoint chart data editable, show units and source ranges, and reconcile totals.

EXPECTED OUTPUT

Save Lumina-Visual-Evidence.pptx with reviewed source evidence and your own Copilot prompt/result.

TOOLS PowerPoint + Excel + Copilot

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 05 · ACCEPTANCE

Add Excel visualizations to Word and PowerPoint

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 5 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC RECAP

Recap — Microsoft 365 Copilot Foundations, Word and PowerPoint

1

Knowledge

Grounding and related principles.

2

Ability

K1 · A1

3

Evidence

A checked Excel control workbook plus the app-specific artifact.

4

Next

Carry the evidence and controls into the next workflow stage.

© 2026 Tertiary Infotech Academy Pte Ltd

02

TOPIC 02

Copilot for Excel: From Questions to Deep Analysis

Tables · formulas · diagnostics · scenario analysis · forecasting · Analyst agent

© 2026 Tertiary Infotech Academy Pte Ltd

ALIGNMENT K3 · A2

Key Concepts — Copilot for Excel: From Questions to Deep Analysis

1

Analysis-ready data

One header row, one record per row, stable types and an Excel Table.

2

Progressive analysis

Start descriptive, then diagnostic, predictive and prescriptive.

3

Formula audit

Accept suggested formulas only after checking logic, references and edge cases.

4

Evidence chain

Question, method, result, caveat and action should be traceable in the workbook.

5

Scenario thinking

Separate assumptions from formulas and compare base, downside and upside cases.

6

Deep analysis

Use Analyst or advanced Copilot features to explore multiple files, patterns and forecasts when licensed.

© 2026 Tertiary Infotech Academy Pte Ltd

Excel Copilot needs structured data

CONCEPT

1. Table: Use an Excel Table with unique headers.
2. Types: Dates, numbers and text must be consistent.

CONTROL / DECISION

1. Grain: One row represents one defined observation.
2. Controls: Retain row counts, totals and exception checks.

© 2026 Tertiary Infotech Academy Pte Ltd

Question ladder for deep analysis

Descriptive

- What happened and how much?

Diagnostic

- Where and why did it differ?

Predictive

- What may happen under stated assumptions?

© 2026 Tertiary Infotech Academy Pte Ltd

Formula generation is a proposal

1. Explain — Ask why the formula matches the business rule.
2. Inspect — Check references, ranges and assumptions.
3. Test — Use boundary, blank, zero and error cases.
4. Control — Compare results with an independent total.

© 2026 Tertiary Infotech Academy Pte Ltd

Segment before explaining

1. **Time**
   Month, week, campaign phase.

2. **Place**
   Market, region or channel.

3. **Product**
   Category, item or offer.

4. **Audience**
   Customer or employee segment.

© 2026 Tertiary Infotech Academy Pte Ltd

Anomaly is a starting point

CONCEPT

1. Validity: Could it be a data or type error?
2. Context: Is there a known event or policy change?

CONTROL / DECISION

1. Comparison: Does it persist across segments or periods?
2. Action: Assign verification rather than deleting automatically.

© 2026 Tertiary Infotech Academy Pte Ltd

Correlation is not causation

Association

- Variables move together in the observed data.

Confounding

- A third factor may drive both.

Direction

- The relationship may run the other way.

© 2026 Tertiary Infotech Academy Pte Ltd

Forecasts are conditional

1

History — Patterns assume some continuity.

2

Method — State how trend and seasonality are handled.

3

Range — Show uncertainty, not only a point estimate.

4

Monitor — Compare actuals and update assumptions.

© 2026 Tertiary Infotech Academy Pte Ltd

Scenario design

1. **Base**
   Most likely assumptions with named sources.

2. **Downside**
   Plausible adverse combination.

3. **Upside**
   Plausible favourable combination.

4. **Trigger**
   Define what evidence moves the plan between cases.

© 2026 Tertiary Infotech Academy Pte Ltd

Sensitivity reveals decision boundaries

CONCEPT

1. Driver: Choose controllable or uncertain inputs.
2. Range: Test realistic values, not decorative extremes.

CONTROL / DECISION

1. Output: Use the decision metric that matters.
2. Boundary: Find where capacity, margin or service fails.

© 2026 Tertiary Infotech Academy Pte Ltd

Analyst agent extends exploration

Multiple files

- Explore related data across available sources.

Reasoning

- Break a broad question into analytical steps.

Artifacts

- Produce tables, charts or analysis outputs.

© 2026 Tertiary Infotech Academy Pte Ltd

Chart selection by question

1. Trend — Line across ordered time.
2. Comparison — Bar or column across categories.
3. Contribution — Sorted bar or waterfall for drivers.
4. Relationship — Scatter for two numeric variables.

© 2026 Tertiary Infotech Academy Pte Ltd

Evidence-ready Excel output

1. **Source**
   Retain original data and extraction context.

2. **Method**
   Keep formulas, pivots and assumptions visible.

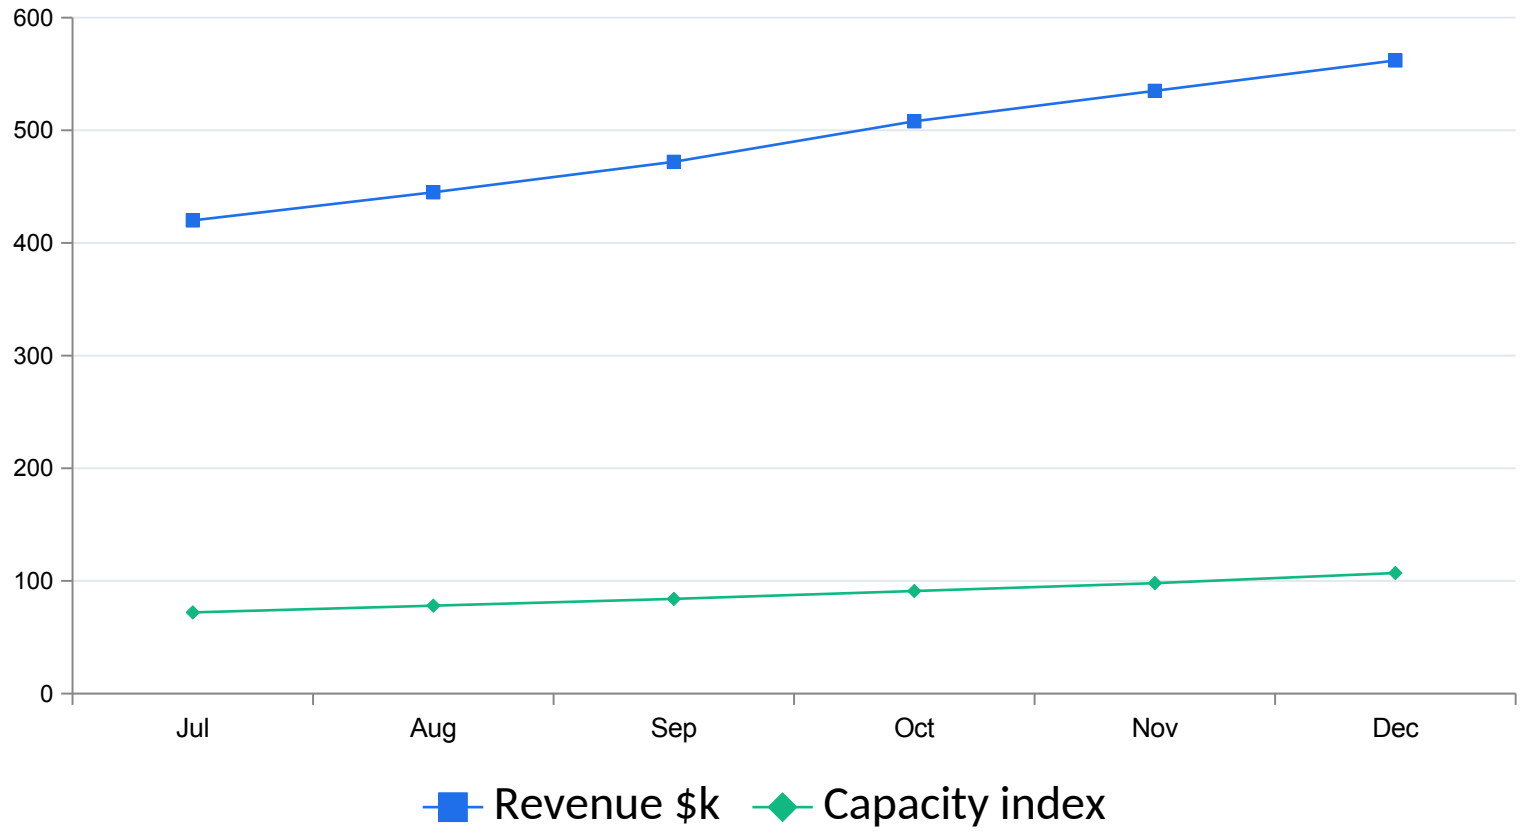

3. **Finding**
   Link every claim to a table or chart.

4. **Caveat**
   State missing data, bias and uncertainty.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 02 · NATIVE CHART

Revenue grows, but capacity tightens

DECISION LENS

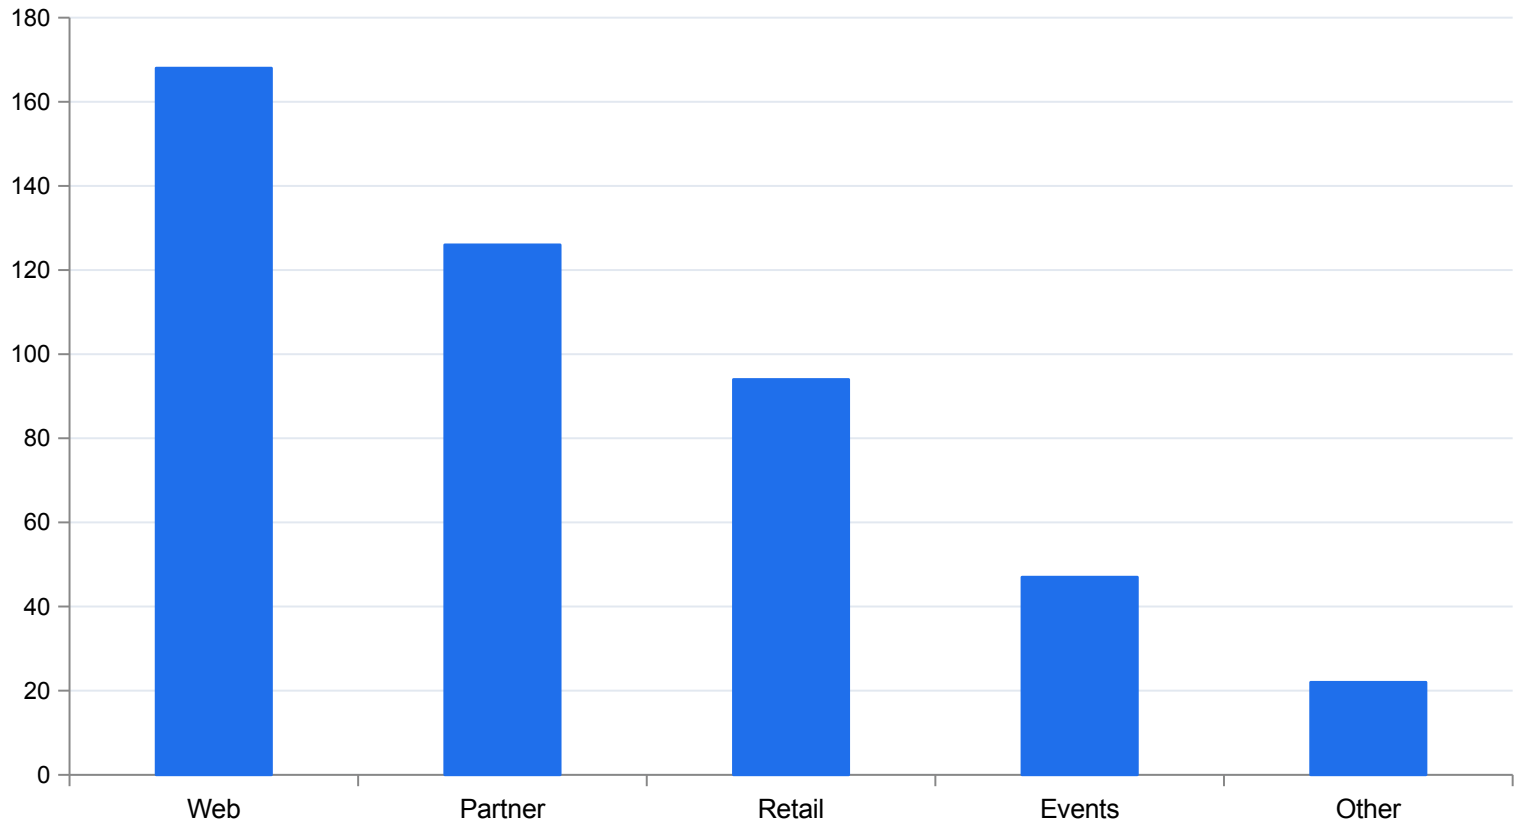

A native line chart connects forecast value with an operational constraint.

Native PowerPoint chart · editable data · verify source and units

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 02 · NATIVE CHART

Three channels drive most contribution

DECISION LENS

A sorted column chart focuses diagnostic attention.

Native PowerPoint chart · editable data · verify source and units

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 02 · FOUNDATION

Build the sales and financial formulas in Excel

LAB 06

Use Copilot to analyse Lumina sales, revenue, costs, margins and targets with auditable Excel formulas.

EXPECTED OUTPUT

Save Lumina-Analysis.xlsx with reviewed source evidence and your own Copilot prompt/result.

TOOLS Excel + Copilot

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 06 · ACCEPTANCE

Build the sales and financial formulas in Excel

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 6 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 02 · INTERMEDIATE

Analyze sales, revenue and financial performance

LAB 07

Explain financial performance with checked charts and a concise Word management report.

EXPECTED OUTPUT

Save Lumina-Management-Report.docx with reviewed source evidence and your own Copilot prompt/result.

TOOLS Excel + Copilot

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 07 · ACCEPTANCE

Analyze sales, revenue and financial performance

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 7 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 02 · ADVANCED

Test launch scenarios and update the decision pack

LAB 08

Test financial assumptions and maintain a controlled transition plan and strategy recommendation.

EXPECTED OUTPUT

Save Lumina-Scenario-Analysis.xlsx with reviewed source evidence and your own Copilot prompt/result.

TOOLS Excel + Analyst agent

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 08 · ACCEPTANCE

Test launch scenarios and update the decision pack

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 8 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC RECAP

Recap — Copilot for Excel: From Questions to Deep Analysis

1

Knowledge

Analysis-ready data and related principles.

2

Ability

K3 · A2

3

Evidence

A checked Excel control workbook plus the app-specific artifact.

End of Day 1

Save your work · Sign out of shared accounts

© 2026 Tertiary Infotech Academy Pte Ltd

03

TOPIC 03

Copilot for Outlook, Teams and Loop

Inbox triage · thread summaries · meeting intelligence · shared plans · human-send controls

© 2026 Tertiary Infotech Academy Pte Ltd

ALIGNMENT K2 · A3

Key Concepts — Copilot for Outlook, Teams and Loop

1. **Communication workflow**
   Triage, understand, draft, coach, approve and send.

2. **Meeting lifecycle**
   Prepare, facilitate, capture, assign and follow through.

3. **Work context**
   Ground summaries and actions in authorised files, chats, meetings and email.

4. **Human-send gate**
   Copilot drafts messages; a responsible person verifies recipients, facts and attachments before sending.

5. **Loop as living plan**
   Components keep tasks, decisions and status synchronised across apps.

6. **Opportunity evaluation**
   Adopt only when value, risk, readiness, owner and success measure are explicit.

© 2026 Tertiary Infotech Academy Pte Ltd

The inbox is a decision queue

CONCEPT

1. Triage: Prioritise by risk, urgency, dependency and value.
2. Understand: Summarise thread, attachments and open questions.

CONTROL / DECISION

1. Respond: Draft a proportional, evidence-based reply.
2. Track: Record owner, commitment and follow-up.

© 2026 Tertiary Infotech Academy Pte Ltd

A reliable email summary

Issue

- What is being asked or reported?

History

- What decisions or actions already occurred?

Open

- What remains unanswered or disputed?

© 2026 Tertiary Infotech Academy Pte Ltd

Draft Instructions shape Outlook output

1

Audience — Relationship, role and expected knowledge.

2

Tone — Direct, diplomatic, reassuring or formal.

3

Structure — Opening, answer, actions and close.

4

Constraints — Length, prohibited commitments and approval needs.

© 2026 Tertiary Infotech Academy Pte Ltd

Human-send gate

1. **Recipients**
   Check To, Cc and unintended exposure.
2. **Facts**
   Verify dates, commitments and attachment names.
3. **Policy**
   Check confidentiality and authorisation.
4. **Approval**
   A responsible person chooses Send.

© 2026 Tertiary Infotech Academy Pte Ltd

Meeting preparation with Copilot

CONCEPT

1. Outcome: Define the decision or alignment required.
2. Pre-read: Bring evidence before discussion.

CONTROL / DECISION

1. Agenda: Allocate time to the hardest decisions.
2. Questions: Frame options, criteria and trade-offs.

© 2026 Tertiary Infotech Academy Pte Ltd

Facilitator and recap

During

- Support agenda, time and shared notes when enabled.

After

- Summarise decisions, actions and unresolved points.

Audio

- Catch up where the licensed experience supports it.

© 2026 Tertiary Infotech Academy Pte Ltd

Action quality

1

Specific — One clear deliverable.

2

Owner — One accountable person.

3

Due — A real date or trigger.

4

Evidence — Definition of done and status source.

© 2026 Tertiary Infotech Academy Pte Ltd

Loop components are portable

1. **Page**
   Provides context and structure.
2. **Table**
   Tracks repeated records and fields.
3. **Task list**
   Makes owner and status explicit.
4. **Share**
   The same component can appear across supported apps.

© 2026 Tertiary Infotech Academy Pte Ltd

A living implementation plan

CONCEPT

1. Backlog: Workstreams and milestones.
2. Decisions: Approved choices and rationale.

CONTROL / DECISION

1. Risks: Triggers, controls and owners.
2. Measures: Adoption, quality, time saved and exception rate.

© 2026 Tertiary Infotech Academy Pte Ltd

Evaluate an opportunity before adopting

Value

- What measurable outcome improves?

Feasibility

- Are data, licence and process ready?

Risk

- What could fail or cause harm?

© 2026 Tertiary Infotech Academy Pte Ltd

Work IQ and organisational context

1

People — Roles and collaboration relationships.

2

Content — Permitted documents, messages and meetings.

3

Activity — Current work patterns and signals.

4

Control — Context is valuable only when governed.

© 2026 Tertiary Infotech Academy Pte Ltd

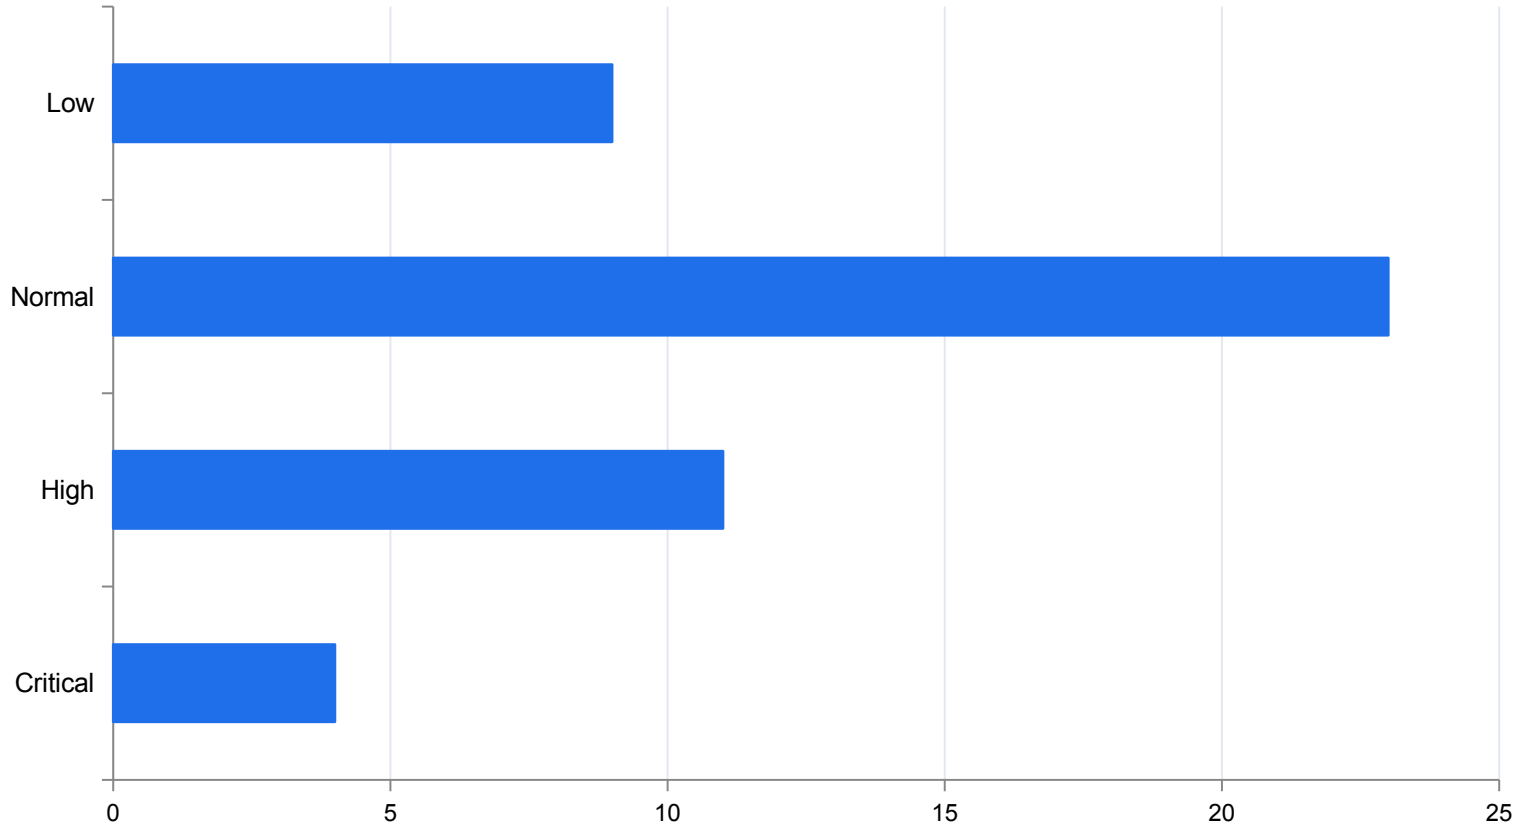

Communication evidence chain

1. **Source**
   Email, meeting, file or register.
2. **Summary**
   A concise, checked interpretation.
3. **Action**
   Owner, due date and status.
4. **Follow-up**
   Draft, approval and retained record.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 03 · NATIVE CHART

Risk and deadlines shape inbox priority

DECISION LENS

Priority is a business rule, not the order messages arrived.

Native PowerPoint chart · editable data · verify source and units

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 03 · NATIVE CHART

Reviewed actions close faster

DECISION LENS

Ownership and due dates improve meeting follow-through.

Native PowerPoint chart · editable data · verify source and units

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 03 · INTERMEDIATE

Draft the launch review email in Outlook

LAB 09

Draft a 150-word review email to the trainer-assigned reviewers. Include the launch decision, readiness gap, A01–A04 owners/dates and reviewed artifact links. Save as a draft; check recipients, links and figures before any manual sandbox send.

EXPECTED OUTPUT

Save Lumina-Outlook-Draft.txt with reviewed source evidence and your own Copilot prompt/result.

TOOLS Outlook + Excel + Copilot

© 2026 Tertiary Infotech Academy Pte Ltd

Draft the launch review email in Outlook

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 9 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 03 · INTERMEDIATE

Run the launch review and post the Teams update

LAB 10

Summarize decisions separately from proposals. Create a 120-word Teams update with A01–A04, owners and dates. Post only to the trainer-assigned sandbox after review, and retain the actual post link.

EXPECTED OUTPUT

Save Lumina-Teams-Update.md with reviewed source evidence and your own Copilot prompt/result.

TOOLS Teams + Excel + Copilot

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 10 · ACCEPTANCE

Run the launch review and post the Teams update

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 10 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 03 · ADVANCED

Monitor launch readiness in Loop

LAB 11

Create one shared SW-2026 Loop task table. Keep action IDs, owners, dates, statuses, evidence links and last review. Embed the same component in Teams and an Outlook draft, then verify an edit through both views.

EXPECTED OUTPUT

Save Lumina-Loop-Evidence.xlsx with reviewed source evidence and your own Copilot prompt/result.

TOOLS Loop + Teams + Excel + Copilot

© 2026 Tertiary Infotech Academy Pte Ltd

Monitor launch readiness in Loop

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 11 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC RECAP

Recap — Copilot for Outlook, Teams and Loop

1

Knowledge

Communication workflow and related principles.

2

Ability

K2 · A3 · A4

3

Evidence

A checked Excel control workbook plus the app-specific artifact.

4

Next

Carry the evidence and controls into the next workflow stage.

TOPIC 04

Microsoft 365 Copilot Agents and Governed Pipelines

Agent types · instructions · knowledge · actions · approvals · monitoring · staff enablement

© 2026 Tertiary Infotech Academy Pte Ltd

ALIGNMENT K4 · A4

Key Concepts — Microsoft 365 Copilot Agents and Governed Pipelines

1

Agent role

An agent applies scoped instructions and knowledge to a repeatable business outcome.

2

Agent spectrum

Retrieval agents answer; task agents act; autonomous agents coordinate multi-step work.

3

Pipeline

Intake, validate, classify, enrich, produce, approve, deliver and monitor.

4

Least privilege

Give the agent only the data and actions required for its defined role.

5

Approval boundary

Consequential writes, sends and status changes require visible human approval.

6

Operational readiness

Pilot with test cases, exception handling, owners, metrics, training and rollback.

© 2026 Tertiary Infotech Academy Pte Ltd

Copilot versus Copilot agent

CONCEPT

1. Copilot: General assistant across supported work surfaces.
2. Agent: Scoped role with instructions, knowledge and sometimes actions.

CONTROL / DECISION

1. Boundary: The agent should have a narrower job than the user.
2. Value: Repeatable outcomes with consistent controls.

© 2026 Tertiary Infotech Academy Pte Ltd

Types of agents

Retrieval

- Find and explain approved knowledge.

Task

- Complete a defined step using tools.

Orchestrator

- Coordinate multiple steps and agents.

© 2026 Tertiary Infotech Academy Pte Ltd

Agent design canvas

1

Outcome — Measurable business result.

2

Inputs — Required fields and approved context.

3

Outputs — Defined response or artifact.

4

Non-actions — What the agent must refuse or escalate.

© 2026 Tertiary Infotech Academy Pte Ltd

Knowledge grounding

1. **Curated**
   Use the smallest authoritative source set.

2. **Current**
   Assign content owner and review date.

3. **Citable**
   Responses should identify supporting evidence.

4. **Safe**
   Exclude unrelated or overly broad repositories.

© 2026 Tertiary Infotech Academy Pte Ltd

Instructions as operational policy

CONCEPT

1. Role: Who the agent represents.
2. Procedure: How it handles common paths.

CONTROL / DECISION

1. Guardrails: Prohibited content and actions.
2. Escalation: When and how a human takes over.

© 2026 Tertiary Infotech Academy Pte Ltd

Actions need contracts

Inputs

- Typed, required and validated.

Operation

- One clear side effect.

Outputs

- Status, ID and explanation.

© 2026 Tertiary Infotech Academy Pte Ltd

Pipeline architecture

1

Intake — Capture structured request.

2

Process — Validate, classify and enrich.

3

Control — Approve consequential transitions.

4

Deliver — Create artifact, draft or controlled record.

© 2026 Tertiary Infotech Academy Pte Ltd

Human approval patterns

1

Pre-action

Approve before write or send.

2

Post-draft

Review generated artifact before release.

3

Exception

Route uncertain or restricted cases.

4

Override

Record who changed the outcome and why.

© 2026 Tertiary Infotech Academy Pte Ltd

Idempotency and duplicate control

CONCEPT

1. Key: Use a stable request or campaign ID.
2. Check: Detect prior active processing.

CONTROL / DECISION

1. Result: Return existing status instead of duplicating.
2. Audit: Record input hash, run ID and outcome.

© 2026 Tertiary Infotech Academy Pte Ltd

Agent evaluation

Correctness

- Does it answer or route accurately?

Grounding

- Does it cite approved evidence?

Safety

- Does it refuse prohibited cases?

© 2026 Tertiary Infotech Academy Pte Ltd

Monitoring the pipeline

1

Throughput — Cases completed per period.

2

Cycle time — Time from intake to approved output.

3

Exception rate — Share diverted for human handling.

4

Override rate — How often humans correct the agent.

© 2026 Tertiary Infotech Academy Pte Ltd

Staff enablement for agents

1. **Role**
   Who uses, approves, owns and supports.

2. **Practice**
   Scenario-based exercises and test cases.

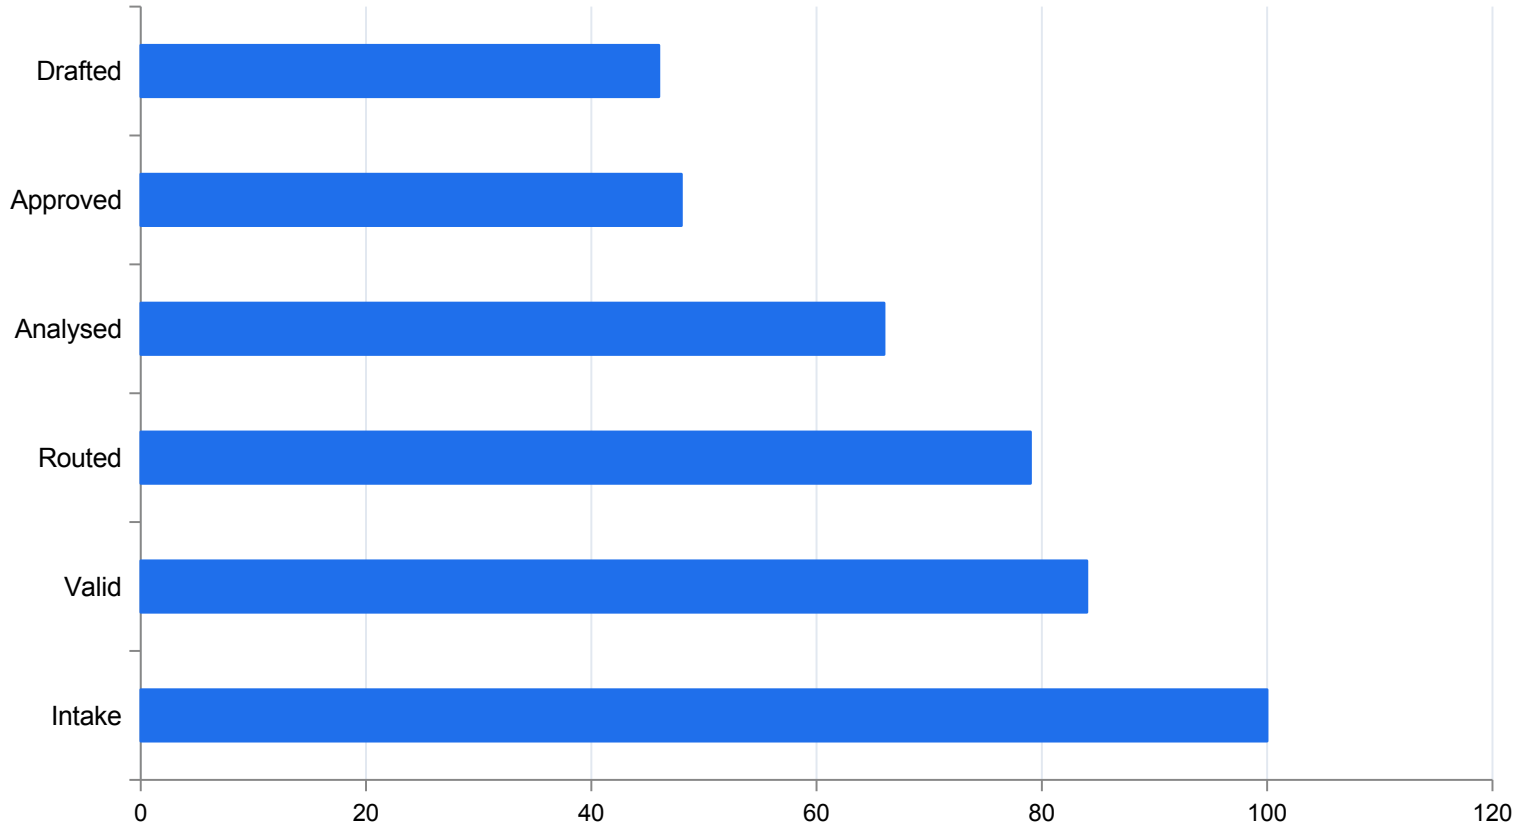

3. **Evidence**
   Demonstrated competent use and control checks.

4. **Support**
   Office hours, issue channel and refresher trigger.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 04 · NATIVE CHART

The pipeline narrows through controls

DECISION LENS

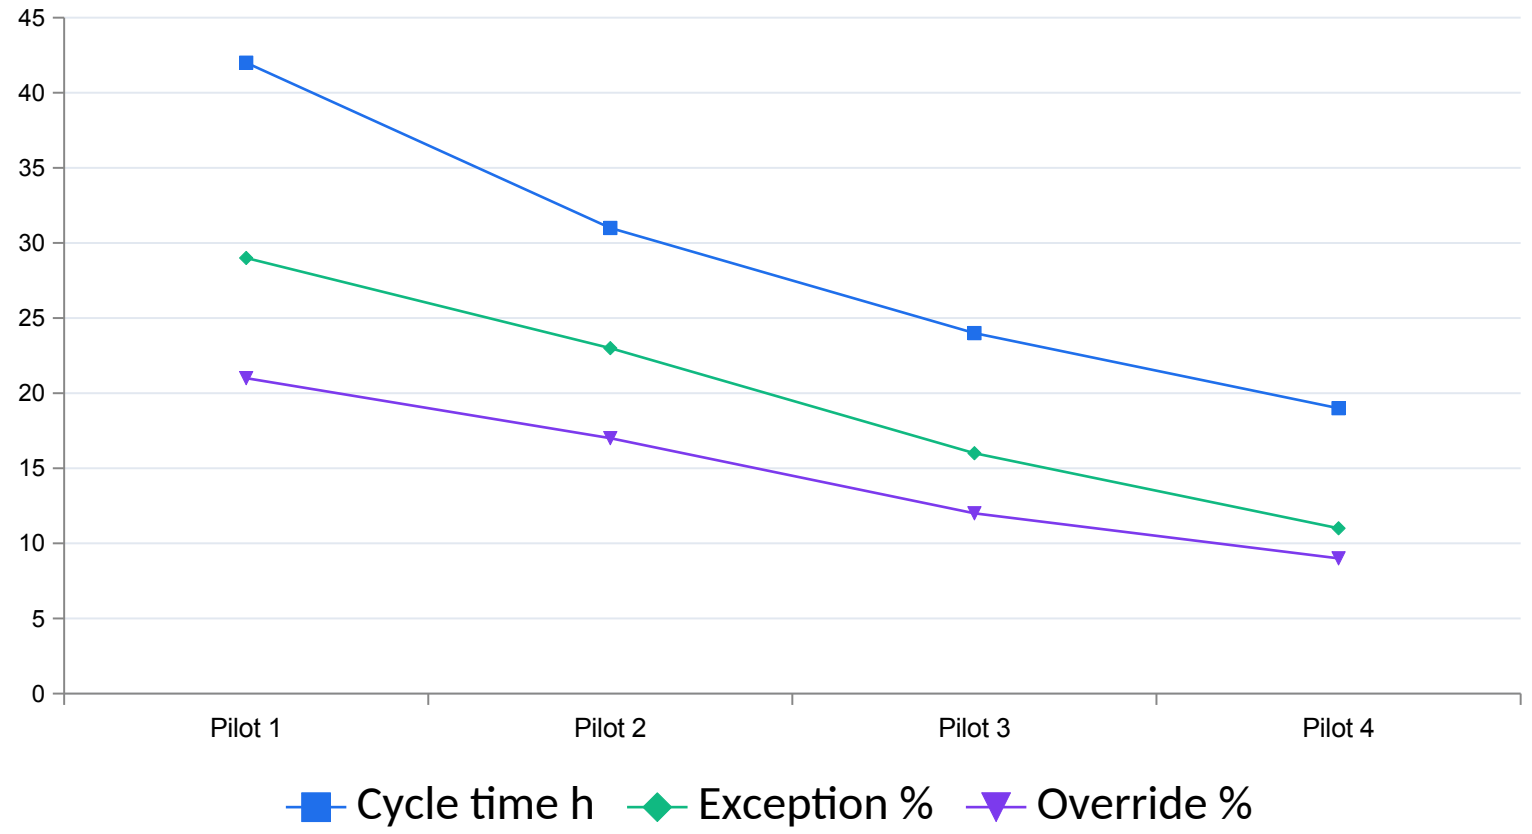

Validation and approval prevent low-quality work reaching delivery.

Native PowerPoint chart · editable data · verify source and units

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 04 · NATIVE CHART

Pilot evidence determines scale

DECISION LENS

Cycle time falls while exceptions and overrides reveal where redesign is needed.

Native PowerPoint chart · editable data · verify source and units

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 04 · FOUNDATION AGENT

Create a source-grounded HR and policy agent

LAB 12

Build a source-scoped HR/campaign agent and record six grounded acceptance tests.

EXPECTED OUTPUT

Save Lumina-HR-Agent-Test-Register.xlsx with reviewed source evidence and your own Copilot prompt/result.

TOOLS Microsoft 365 Copilot agents + Excel

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 12 · ACCEPTANCE

Create a source-grounded HR and policy agent

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 12 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

Route a launch service issue with an agent

LAB 13

For SW-2026 request REQ-101, a chair is damaged and delivery is due tomorrow. Recommend queue and priority, cite SR-01, ask for missing facts and do not submit a ticket. Preserve the request ID in the evidence register.

EXPECTED OUTPUT

Save Lumina-Routing-Test-Register.xlsx with reviewed source evidence and your own Copilot prompt/result.

TOOLS Copilot Studio / Agent Builder + Excel

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 13 · ACCEPTANCE

Route a launch service issue with an agent

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 13 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

Connect the recommendation to a reviewed action

LAB 14

Pass a reviewed routing recommendation to a separately configured training flow. Validate required fields, require human review and record the returned item/run ID. If no flow is configured, record Not run rather than claiming success.

EXPECTED OUTPUT

Save Lumina-Action-Run-Register.xlsx with reviewed source evidence and your own Copilot prompt/result.

TOOLS Copilot Studio + Power Automate + Excel

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 14 · ACCEPTANCE

Connect the recommendation to a reviewed action

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 14 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 04 · ADVANCED PIPELINE

Integrate the analysis into a decision presentation

LAB 15

Use Copilot to generate a professional six-slide financial or marketing presentation from reviewed reports.

EXPECTED OUTPUT

Save Lumina-Decision-Deck.pptx with reviewed source evidence and your own Copilot prompt/result.

TOOLS Microsoft 365 Copilot + Analyst + PowerPoint + Excel

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 15 · ACCEPTANCE

Integrate the analysis into a decision presentation

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 15 acceptance checks in the LG and activity folder.

© 2026 Tertiary Infotech Academy Pte Ltd

Deliver and monitor the complete Lumina workflow

LAB 16

Complete the handoff: review Word and Excel, approve the deck, save the Outlook draft, post a reviewed update in the training Teams channel, and monitor the same Loop actions. Record actual links, recipients, approvals and outcomes; do not mark unperformed actions complete.

EXPECTED OUTPUT

Save Lumina-Release-Evidence.xlsx with reviewed source evidence and your own Copilot prompt/result.

TOOLS Microsoft 365 Copilot agents + Outlook + Teams + Excel

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 16 · ACCEPTANCE

Deliver and monitor the complete Lumina workflow

ACCEPTANCE CHECK

Source facts and formulas are verified; required outputs and evidence are saved. Follow the current Lab 16 acceptance checks in the LG and activity folder.

TOPIC RECAP

Recap — Microsoft 365 Copilot Agents and Governed Pipelines

1 **Knowledge**
Agent role and related principles.

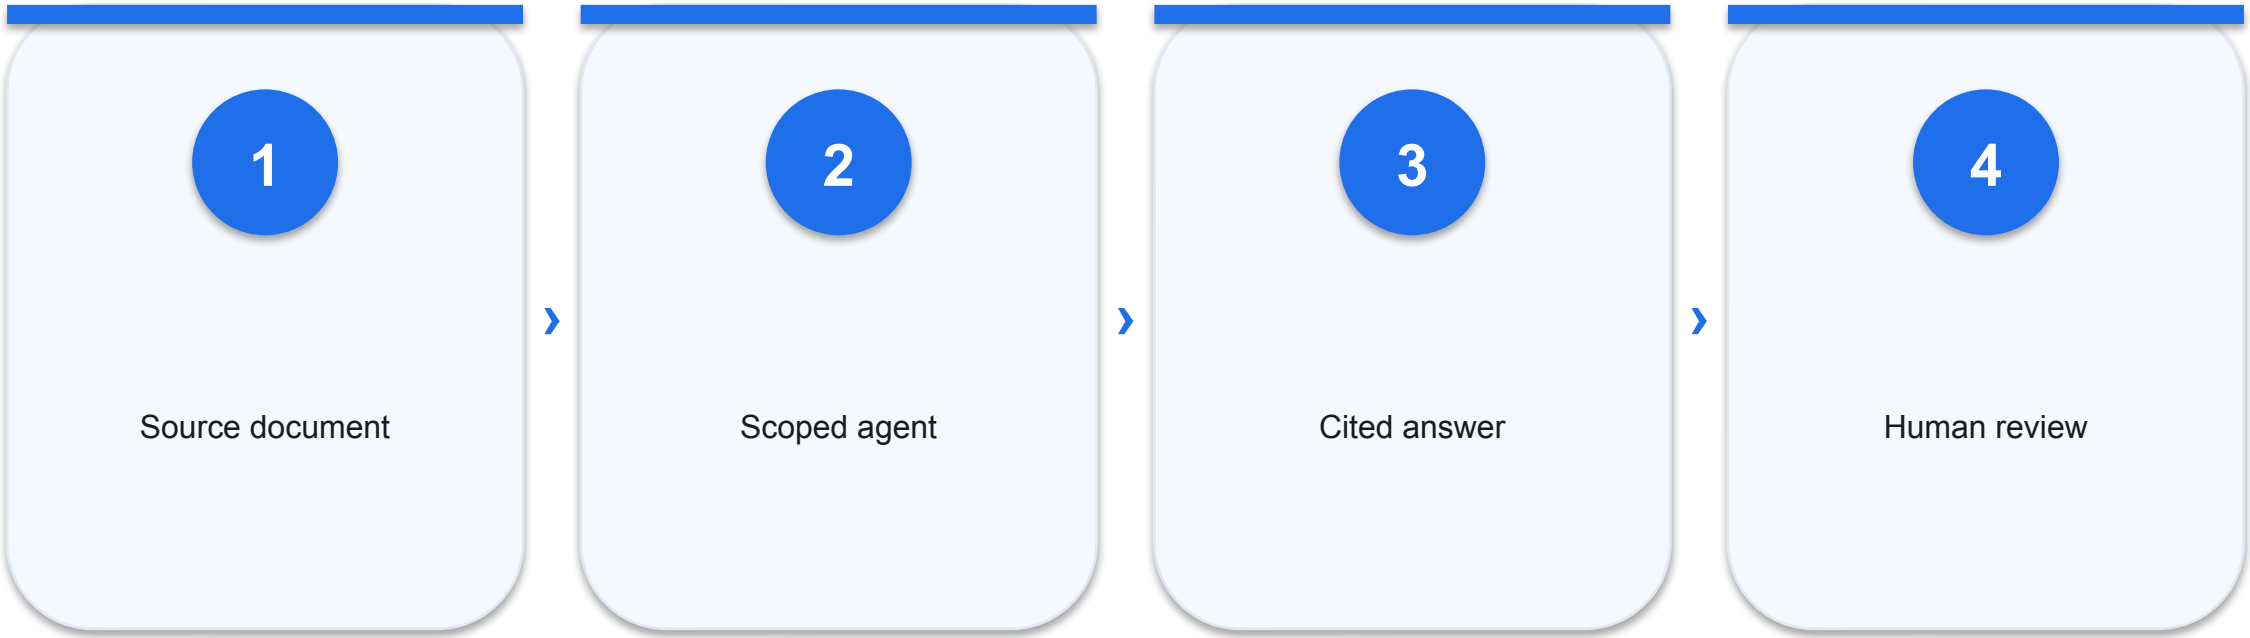

2 **Ability**
K1-K4 · A1-A4

3 **Evidence**
A checked Excel control workbook plus the app-specific artifact.

4 **Next**
Carry the evidence and controls into the next workflow stage.

© 2026 Tertiary Infotech Academy Pte Ltd

From SharePoint source to verified response

© 2026 Tertiary Infotech Academy Pte Ltd

KNOWLEDGE DESIGN

Three agents, three source contracts

AGENT AND SOURCE

1. Policy agent: EXP-01 expense rules
2. Campaign agent: CAM-2026-Q4 brief
3. Routing agent: SR-01 service guide

RESPONSE CONTRACT

1. Cite the exact source and section
2. Ask when a required fact is missing
3. Produce a draft; preserve human approval

© 2026 Tertiary Infotech Academy Pte Ltd

The course knowledge architecture

1. Private Lumina site
2. Three DOCX sources
3. Three .agent files
4. Training accounts

© 2026 Tertiary Infotech Academy Pte Ltd

Source selection is a design decision

SOURCE CHOICE

1. A file gives a narrow factual scope
2. A folder groups a maintained topic
3. A whole site widens retrieval scope

QUALITY CONTROL

1. Verify owner, version and effective date
2. Exclude unrelated sites and test fixtures
3. Inspect citations rather than trusting tone

© 2026 Tertiary Infotech Academy Pte Ltd

SYNTHETIC EXP-01

Worked policy decision: SGD 48 taxi fare

SOURCE FACTS

1. Business taxi: potentially claimable
2. SGD 48 exceeds the SGD 40 threshold
3. Receipt and purpose are required
4. Submit within 14 calendar days

VERIFIED OUTPUT

1. Manager approval is required
2. Agent explains; it cannot approve
3. Cite EXP-01 local travel and evidence
4. Record the actual response in Excel

© 2026 Tertiary Infotech Academy Pte Ltd

CONFIGURATION · NO CLAIM SUBMISSION OR PAYMENT

Policy instructions make the boundary visible

1. Read EXP-01
2. Cite the section
3. Identify missing facts
4. Refer approval

© 2026 Tertiary Infotech Academy Pte Ltd

Worked routing: damaged chair due tomorrow

INPUT AND RULE

1. REQ-101: damaged chair reported
2. Due tomorrow: within two business days
3. SR-01 routes damage to Operations

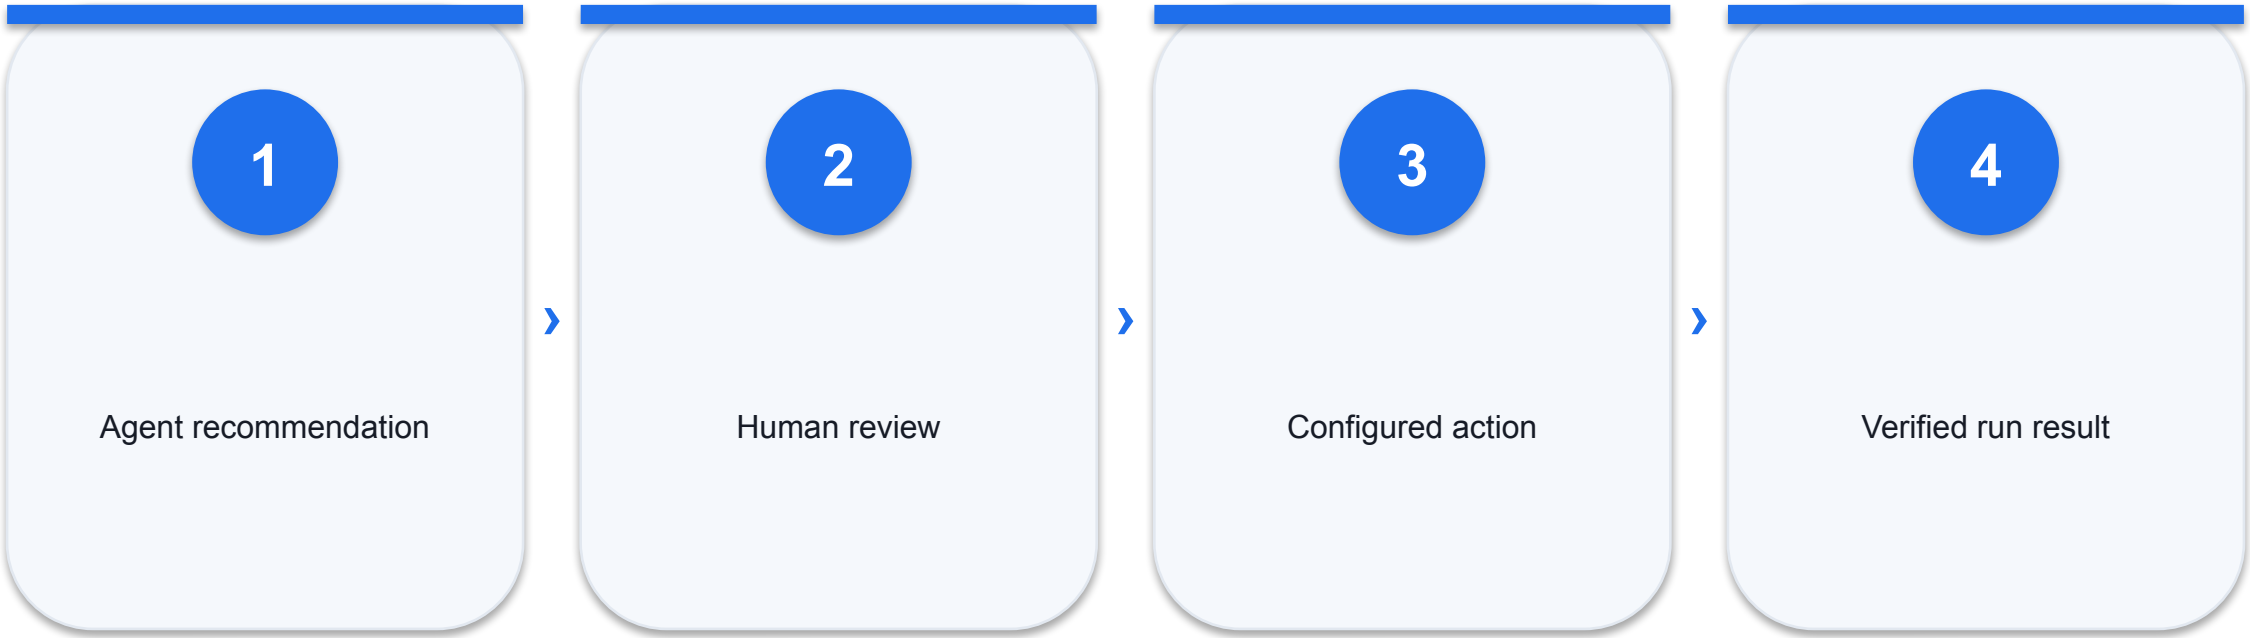

RECOMMENDATION

1. Queue recommendation: Operations
2. Priority recommendation: High
3. Unsafe product requires supporting facts
4. No ticket write is implied

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 14 · RECORD EACH STATE SEPARATELY

A knowledge source is not an action connector

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 15 · SYNTHETIC CAMPAIGN

Campaign facts that can travel into a deck

SOURCE FACTS

1. Budget: SGD 18000
2. Target: 120 qualified enquiries
3. Launch: 1 October 2026
4. Authority: CAM-2026-Q4

RELEASE CONTROL

1. Cite every factual claim
2. Label copy DRAFT FOR MARKETING REVIEW
3. Reject unsupported carbon-neutral claims
4. Carry verified facts into Word and PPT

© 2026 Tertiary Infotech Academy Pte Ltd

Sharing has two access checks

CHECKS

1. Can the intended user open the agent?
2. Can that user open the cited source?
3. Site membership supports collaboration

COURSE WORKSPACE

1. Training 1: site owner
2. Training 2 and admin: site members
3. Test each identity; log the actual outcome
4. Site/agent sign-in required; public links unavailable

© 2026 Tertiary Infotech Academy Pte Ltd

Maintain the source, then repeat the test

1. Versioned source edit
2. Readiness check
3. Same test question
4. Citation comparison

© 2026 Tertiary Infotech Academy Pte Ltd

Failures belong in the evidence register

FAILURE CASE

1. Unknown fact: source does not establish it
2. Preparing: response test remains pending
3. Missing date: ask a clarification
4. No action result: no verified write

REQUIRED TRACE

1. Log prompt and actual response
2. Open and verify each citation
3. Record source version and account role
4. Retain failures and reviewer corrections

© 2026 Tertiary Infotech Academy Pte Ltd

LIVE TRAINING WORKSPACE

Open the Lumina SharePoint workspace

WRAP-UP

Evidence, Assessment & Next Steps

© 2026 Tertiary Infotech Academy Pte Ltd

LEARNING OUTCOMES

What You Achieved

1

LO1

Predict and mitigate challenges in integrating Microsoft 365 Copilot into a workflow.

2

LO2

Develop a plan for implementing Microsoft 365 Copilot and transitioning from a legacy workflow.

3

LO3

Evaluate productivity opportunities across Teams, Outlook and Microsoft 365 Copilot Chat.

4

LO4

Design a staff enablement plan and a governed Copilot agent pipeline.

Courseware and Assessment on the LMS

Courseware

- Learner slide PDF
- Learner Guide PDF
- Sixteen activity folders

Assessment

- WA question paper
- PP question paper
- Submit required evidence

https://lms-tms.tertiaryinfotech.com/

Support

- Check the current TGS code
- Use the current release
- Contact the trainer or academy

© 2026 Tertiary Infotech Academy Pte Ltd

FINAL ASSESSMENT

Assessment Reminder

1. **WA**
   4 open-ended knowledge questions, 60 minutes.
2. **PP**
   4 connected Microsoft 365 tasks, 60 minutes.
3. **Open book**
   slides, Learner Guide and approved materials.
4. **Attendance**
   Complete assessment digital attendance before starting.
5. **Submission**
   Upload only your own completed papers and evidence.

© 2026 Tertiary Infotech Academy Pte Ltd

ON ASSESSMENT DAY

Assessment Flow

1. TRAQOM digital attendance
2. Assessment digital attendance
3. Sit WA then PP
4. Submit on the LMS
5. Sign Assessment Summary Record

© 2026 Tertiary Infotech Academy Pte Ltd

Digital Attendance (Mandatory)

1

Assessment attendance

Scan the SSG QR code before the papers.

2

Training attendance

Confirm AM and PM records for both days.

3

Minimum attendance

At least 75% is required.

4

Ask for help

Tell the trainer immediately if submission fails.

© 2026 Tertiary Infotech Academy Pte Ltd

THANK YOU

Copilot accelerates work only when evidence and control travel with it.

Ground, verify, approve and monitor every workflow—from first prompt to governed agent pipeline.

© 2026 Tertiary Infotech Academy Pte Ltd
