LAB 03

Refine a Responsible Copilot Use Policy in Word

Intermediate · Word + Excel + Copilot · K1 · A1

Use Word Copilot to consolidate review feedback while retaining governance controls and an audit trail.

Files in this folder

- Start with Lumina-Living-Lab-03.xlsx and retain all outputs inside this lab folder.
- The completed/ subfolder is for comparison after your own attempt.

Primary prompt

Revise the attached Responsible Copilot Use Policy using the Review_Log workbook. Resolve only items marked Approved. Preserve the sections on data classification, human review, prohibited inputs, attribution, incident escalation and record retention. Add a one-page staff checklist and a change summary table.

Detailed procedure

1. Open the policy draft and Review_Log workbook side by side.

Sort the log by Decision and confirm the Approved count.

2. Ask Copilot to list proposed changes before editing.

PROMPT: Compare the policy with the Review_Log. List the exact edits required for rows marked Approved. Do not apply Pending or Rejected suggestions.

3. Validate the proposed edits against the log.

Mark each approved item Ready or Needs clarification in the workbook.

4. Request the controlled revision.

PROMPT: Revise the attached Responsible Copilot Use Policy using the Review_Log workbook. Resolve only items marked Approved. Preserve the sections on data classification, human review, prohibited inputs, attribution, incident escalation and record retention. Add a one-page staff checklist and a change summary table.

5. Review policy language for enforceability and plain language.

Replace vague words such as appropriate with a named owner, trigger or action where the source supports it.

6. Record each accepted change and its source row.

Complete the Change_Evidence sheet.

7. Save the revised policy as a new version.

Keep the original draft unchanged for comparison.

Acceptance test

Every change traces to an Approved review row, all mandatory controls remain, and the policy includes a usable staff checklist.

Evidence to retain

- Completed Excel workbook with prompt and evidence registers.
- App-specific output named in the expected result.
- A screenshot showing the final state without credentials.
- A short note explaining verification, exception and human approval.
