Course Overview

Enhance Work Productivity with Microsoft 365 Copilot is a two-day, 16-hour WSQ programme aligned to Digital Technology Adoption and Innovation (ACC-ICT-4004-1.1). Learners apply Microsoft 365 Copilot across Word, PowerPoint, Excel, Outlook, Teams and Loop before designing and operating a governed Microsoft 365 Copilot agent pipeline.

Course Code	TGS-2024043856
Training Duration	16 hours across 2 days
Assessment	WA 60 minutes; PP 60 minutes
Trainer	Dr Alfred Ang
Mode	Instructor-led classroom with individual Microsoft 365 activities

Learning Outcomes

- LO1: Predict and mitigate challenges in integrating Microsoft 365 Copilot into a workflow.
- LO2: Develop a plan for implementing Microsoft 365 Copilot and transitioning from a legacy workflow.
- LO3: Evaluate productivity opportunities across Teams, Outlook and Microsoft 365 Copilot Chat.
- LO4: Design a staff enablement plan and a governed Copilot agent pipeline.

Daily Schedule

Day 1: Copilot foundations, Word, PowerPoint and deep Excel analysis

Time	Duration	Topic / Activity	Method	Slides
9:00-9:20	20 min	Welcome, AM digital attendance, introductions and outcomes	Facilitated briefing	—
9:20-10:20	60 min	Topic 1: Copilot grounding, prompt framework, responsible use and transition risks	Concept briefing, visual examples and questioning	Slides 19-45
10:20-10:30	10 min	Tea break	Break	—
10:30-12:30	120 min	Labs 1-3: safe prompting and Word workflows	Demonstration, individual practice and debrief	Slides 35-40
12:30-13:30	60 min	Lunch break	Lunch	—
13:30-14:15	45 min	PowerPoint storytelling and native-chart design	Concept briefing, visual examples and questioning	Slides 19-45
14:15-15:20	65 min	Labs 4-5: leadership story and native charts	Demonstration, individual practice and debrief	Slides 41-44
15:20-15:30	10 min	Tea break	Break	—
15:30-16:15	45 min	Topic 2: analysis-ready data, deep analysis, forecasting and scenarios	Concept briefing, visual examples and questioning	Slides 46-68
16:15-17:45	90 min	Labs 6-8: formulas, diagnosis, forecasting and stress testing	Demonstration, individual practice and debrief	Slides 62-67
17:45-18:00	15 min	Day 1 reflection, evidence check and PM digital attendance	Reflection and Q&A	—

Scheduled learning and assessment time excluding lunch: 480 minutes (8 hours).

Day 2: Outlook, Teams, Loop and governed Microsoft 365 agent pipelines

Time	Duration	Topic / Activity	Method	Slides
9:00-9:15	15 min	Day 1 recap and AM digital attendance	Facilitated briefing	—
9:15-10:00	45 min	Topic 3: Outlook, Teams, Loop and communication controls	Concept briefing, visual examples and questioning	Slides 70-92
10:00-10:10	10 min	Tea break	Break	—
10:10-12:00	110 min	Labs 9-11: inbox, meeting and living implementation plan	Demonstration, individual practice and debrief	Slides 86-91
12:00-12:30	30 min	Topic 4: agent roles, knowledge, instructions and pipeline architecture	Concept briefing, visual examples and questioning	Slides 94-120
12:30-13:30	60 min	Lunch break	Lunch	—
13:30-14:10	40 min	Agent actions, approvals, evaluation, monitoring and staff enablement	Concept briefing, visual examples and questioning	Slides 94-120
14:10-15:50	100 min	Labs 12-16: agent design, actions and governed end-to-end pipeline	Demonstration, individual practice and debrief	Slides 110-119
15:50-16:00	**10 min**	**Course recap, assessment briefing and assessment digital attendance**	**Individual summative assessment**	**—**
16:00-17:00	**60 min**	**Written Assessment (WA/SAQ), open book**	**Individual summative assessment**	**—**
17:00-18:00	**60 min**	**Practical Performance (PP), open book**	**Individual summative assessment**	**—**

Scheduled learning and assessment time excluding lunch: 480 minutes (8 hours).

Topic-by-Topic Delivery Guide

Topic 01: Microsoft 365 Copilot Foundations, Word and PowerPoint · Slides 19-45

Grounding · responsible use · prompt design · drafting · presentation storytelling

- **Grounding:** Copilot combines the prompt with permitted work or web context; access permissions still apply.
- **Prompt contract:** State goal, context, source and expectations, then verify before using the result.
- **Human accountability:** Copilot proposes; the user checks evidence, tone, sensitivity and final release.
- **Cross-app story:** Word shapes the narrative, Excel supplies evidence and PowerPoint communicates the decision.
- **Responsible AI:** Fairness, reliability, privacy, inclusiveness, transparency and accountability guide use.
- **Transition risk:** Licensing, data quality, permissions, adoption and over-trust need explicit controls.

Lab 01: Set Up Microsoft 365 Copilot and Prompt Safely · Slides 35-36

Alignment: K1 · A1. Learner output: Completed setup, grounding and prompt-review register in Excel. Acceptance: The register identifies the active Copilot surface, grounding source, three evidence-backed gaps and a verification status for every claim.

Lab 02: Draft a Project Brief in Word from Excel Evidence · Slides 37-38

Alignment: K1 · A1. Learner output: Two-page launch brief with cited objectives, milestones, risks and open questions. Acceptance: The brief matches the workbook, contains no invented facts and retains [TO CONFIRM] markers for missing evidence.

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Lab 03: Refine a Responsible Copilot Use Policy in Word · Slides 39-40

Alignment: K1 · A1. Learner output: Approved policy draft, issue log and staff quick-reference checklist. Acceptance: Every change traces to an Approved review row, all mandatory controls remain, and the policy includes a usable staff checklist.

Lab 04: Build a PowerPoint Story from Word and Excel · Slides 41-42

Alignment: K1 · A1. Learner output: Eight-slide leadership deck with one message per slide and a documented evidence map. Acceptance: The deck contains eight coherent slides, all quantitative claims trace to the workbook and the final slide asks for a specific decision.

Lab 05: Enhance PowerPoint with Native Charts and Speaker Notes · Slides 43-44

Alignment: K1 · A1. Learner output: Polished deck with native trend, contribution and variance charts plus verified speaker notes. Acceptance: The PPTX contains three editable native charts, sample values reconcile, and each chart communicates a decision-relevant takeaway.

Topic 02: Copilot for Excel: From Questions to Deep Analysis · Slides 46-68

Tables · formulas · diagnostics · scenario analysis · forecasting · Analyst agent

- **Analysis-ready data:** One header row, one record per row, stable types and an Excel Table.
- **Progressive analysis:** Start descriptive, then diagnostic, predictive and prescriptive.
- **Formula audit:** Accept suggested formulas only after checking logic, references and edge cases.
- **Evidence chain:** Question, method, result, caveat and action should be traceable in the workbook.
- **Scenario thinking:** Separate assumptions from formulas and compare base, downside and upside cases.
- **Deep analysis:** Use Analyst or advanced Copilot features to explore multiple files, patterns and forecasts when licensed.

Lab 06: Build and Audit Excel Formulas with Copilot · Slides 62-63

Alignment: K3 · A2. Learner output: Formula-driven campaign table with revenue, margin, conversion, status and error controls. Acceptance: All derived columns use auditable formulas, zero denominators are handled intentionally and the Controls sheet contains no unexplained errors.

Lab 07: Run Deep Descriptive and Diagnostic Analysis in Excel · Slides 64-65

Alignment: K3 · A2. Learner output: Diagnostic workbook with KPI summary, segment analysis, anomaly log and management findings. Acceptance: The workbook separates facts from hypotheses, reconciles totals, documents anomalies and presents three defensible findings with caveats.

Lab 08: Forecast and Stress-Test a Campaign with Copilot · Slides 66-67

Alignment: K3 · A2. Learner output: Forecast model with base, downside and upside scenarios, sensitivity table and decision guardrails. Acceptance: All scenarios are formula-driven, forecast uncertainty is explicit and the recommended action is linked to a measurable trigger.

Topic 03: Copilot for Outlook, Teams and Loop · Slides 70-92

Inbox triage · thread summaries · meeting intelligence · shared plans · human-send controls

- **Communication workflow:** Triage, understand, draft, coach, approve and send.
- **Meeting lifecycle:** Prepare, facilitate, capture, assign and follow through.
- **Work context:** Ground summaries and actions in authorised files, chats, meetings and email.
- **Human-send gate:** Copilot drafts messages; a responsible person verifies recipients, facts and attachments before sending.
- **Loop as living plan:** Components keep tasks, decisions and status synchronised across apps.
- **Opportunity evaluation:** Adopt only when value, risk, readiness, owner and success measure are explicit.

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Lab 09: Triage an Outlook Inbox and Draft a Controlled Reply · Slides 86-87

Alignment: K2 · A3. Learner output: Inbox triage register, verified thread summary and one approval-ready draft reply. Acceptance: The draft remains unsent, all facts and recipients are checked, and the triage register shows priority, owner and next action.

Lab 10: Run an Action-Oriented Teams Meeting · Slides 88-89

Alignment: K2 · A3. Learner output: Meeting brief, decision log, action register and reviewed follow-up message. Acceptance: The action register reconciles with the reviewed meeting recap and every action has one owner, due date and status.

Lab 11: Build a Living Implementation and Training Plan in Loop · Slides 90-91

Alignment: K2 · A3 · A4. Learner output: Loop workspace design, transition backlog, training matrix and adoption dashboard. Acceptance: The plan covers transition risks and staff training, distinguishes decisions from proposals and has measurable adoption controls.

Topic 04: Microsoft 365 Copilot Agents and Governed Pipelines · Slides 94-120

Agent types · instructions · knowledge · actions · approvals · monitoring · staff enablement

- **Agent role:** An agent applies scoped instructions and knowledge to a repeatable business outcome.
- **Agent spectrum:** Retrieval agents answer; task agents act; autonomous agents coordinate multi-step work.
- **Pipeline:** Intake, validate, classify, enrich, produce, approve, deliver and monitor.
- **Least privilege:** Give the agent only the data and actions required for its defined role.
- **Approval boundary:** Consequential writes, sends and status changes require visible human approval.
- **Operational readiness:** Pilot with test cases, exception handling, owners, metrics, training and rollback.

Lab 12: Design a Scoped Microsoft 365 Copilot Agent · Slides 110-111

Alignment: K4 · A4. Learner output: Agent design canvas, knowledge register, risk controls and ten acceptance tests. Acceptance: The agent has a narrow purpose, explicit non-actions, least-privilege knowledge and ten test cases with expected outcomes.

Lab 13: Build an Intake and Routing Agent · Slides 112-113

Alignment: K4 · A4. Learner output: Working intake agent, controlled instructions, knowledge source and routed test results. Acceptance: The agent gathers mandatory fields, cites approved knowledge, routes correctly and refuses approval or external-send requests.

Lab 14: Connect an Agent to a Controlled Action · Slides 114-115

Alignment: K4 · A4. Learner output: Agent-to-queue flow with validation, approval state, response ID and run audit. Acceptance: Only validated cases create Draft records, duplicate submissions are controlled and every run has traceable evidence.

Lab 15: Create an Analysis-to-Deck Agent Pipeline · Slides 116-117

Alignment: K4 · A4. Learner output: Three-stage pipeline specification, analysis workbook, chart-led decision deck and approval log. Acceptance: The pipeline stops at review, the workbook reconciles, the deck has editable charts and every quantitative claim has a source range.

Lab 16: Operate a Governed End-to-End Copilot Pipeline · Slides 118-119

Alignment: K1-K4 · A1-A4. Learner output: End-to-end pilot run, approved Outlook draft, Teams handover, monitoring dashboard and staff training plan. Acceptance: All pilot cases have a complete audit trail, delivery remains human-controlled and the scale decision is supported by measured operational evidence.

Resources Required

- Microsoft 365 training tenant with the Copilot experiences enabled for the class route.
- Microsoft Word, PowerPoint, Excel, Outlook, Teams and Loop.
- Microsoft 365 Copilot agent builder or Copilot Studio and Power Automate where available.
- Learner Guide and sixteen self-contained activities folders.
- Every activity's starter Excel workbook and any activity-specific Word or PowerPoint artifact.
- LMS/TMS access for courseware, attendance and assessment submission.

Assessment

- Written Assessment (WA/SAQ) — 4 open-ended questions, 60 minutes, open book.
- Practical Performance (PP) — 4 connected Microsoft 365 tasks, 60 minutes, open book.
- Assessment starts at 4:00 PM on Day 2 and ends at 6:00 PM.
- Assessment is individual and open book. Learners submit the completed papers and required evidence through the LMS.
- A minimum of 75% attendance and a Competent assessment outcome are required.
