TOPIC 4 · CREATE MICROSOFT AGENT
LAB 14 THEME · GOVERNED SHARING AND ENABLEMENT

Lab 14 — Share the HR Agent with Named Users and Deliver Staff Enablement

Maps to	LO4: design a staff training plan while configuring, testing and sharing a grounded Microsoft 365 HR agent.
Duration	30 minutes
Tools	Microsoft 365 Copilot (copilot.cloud.microsoft) · Agent Builder · OneDrive · Excel
Mock data	data/Lumina_HR_Cases.xlsx, data/knowledge/Lumina_HR_Policy_Handbook.docx, data/knowledge/Lumina_Verified_Snapshot.docx, data/knowledge/Lumina_HR_Cases.xlsx, data/knowledge/Lumina_Staff_Enablement_Plan.docx, data/knowledge/Lumina_Knowledge_Inventory.csv, data/knowledge/Lumina_HR_Agent_Owner_Config_Register.csv
Lab files	data/templates/Lumina_Staff_Enablement_Plan.md (Staff training plan); data/templates/Lumina_HR_Agent_Test_Matrix.csv (Sharing gate)
Course	Enhance Work Productivity with Microsoft 365 Copilot (TGS-2024043856) · v9.5
Prompts	https://tertiarycourses.github.io/TGS-2024043856-Enhance-Work-Productivity-with-Microsoft-365-Copilot/prompts/#lab-14

Goal

A named-user sharing record, a test-user result, an Excel staff enablement tracker and a rollback-ready owner plan.

What You Will Do

Share Lumina HR Policy Agent only after the blocking tests pass. Verify that named users already have access to every knowledge file, retest as a user, then use an Excel staff enablement tracker to track staff practice, defects and retests as part of the LO4 staff training plan.

What You Will Build

A named-user sharing record, a test-user result, an Excel staff enablement tracker and a rollback-ready owner plan.

Prerequisites

- Microsoft 365 account with Copilot available in Word, Excel, PowerPoint and Outlook. Availability depends on the assigned licence and tenant settings; confirm access with the trainer before class.
- Desktop Excel on Windows or Mac is recommended; save working copies to your assigned OneDrive course folder with AutoSave on. Do not overwrite the supplied input.
- Download this whole lab folder. All files are synthetic; Lumina-HR-v9 is your own learner output folder.
- Microsoft 365 Copilot licence with Agent Builder enabled by your administrator. Skills in agents are a preview for Frontier-enrolled tenants; otherwise use the labelled manual route. Use the supplied configuration-and-test route when Agent Builder is unavailable.

Data note

Lumina Living Pte Ltd and all of its employees, HR cases and HR policies are fictional. Use the verified 120-case baseline and fixed reporting date 30 September 2026. Current case owners are evidence; proposals are not approved. The HR agent answers from approved knowledge only and never approves requests, sends messages or reveals another employee's data.

Steps

Step 1. Confirm every blocking test passed in Lab 13. Assign the agent owner, knowledge owner (HR Director), HR reviewer and support roles in the owner/configuration register.

Step 2. Open Share and review the user (Can chat) and owner (Can edit) roles. Start with one named test user or approved group; give users Can chat, not Can edit.

Step 3. Verify the user already has permission to each OneDrive or SharePoint knowledge file. Do not broaden permissions for the exercise.

Step 4. Share the link with the named test user only. If sharing is unavailable, finish the plan without claiming distribution. The user runs T01, T05 and T06 and you record the results.

Step 5. Create an Excel staff enablement tracker from data/templates/Staff_Enablement_Tracker.csv using only observed results.

PROMPT / CHECK — copy and adapt

```
MICROSOFT LOOP COPILOT:
Create a Lumina HR Policy Agent staff enablement tracker with columns User, Role, Practice
test, Evidence, Defect, Owner, Retest and Status. Include cited leave-policy retrieval,
UNKNOWN, privacy and approval-refusal tests. Do not fabricate completion or approval.
```

Step 6. Review data/templates/Lumina_Staff_Enablement_Plan.md: purpose, access, practice cases, escalation, owners, monthly review and rollback. Keep the LO4 focus on the staff training plan for the agent.

Step 7. Record the final private or named-user state, the actual link if available, test results and the next review date. Do not submit to the organisation catalogue or deploy to other channels.

Sample Prompts

Use the app labelled for each prompt (or adapt it). Name the table and columns, state the output, and always verify the result. Use the linked prompts web page for one-click Copy buttons.

Copy-ready prompts: https://tertiarycourses.github.io/TGS-2024043856-Enhance-Work-Productivity-with-Microsoft-365-Copilot/prompts/#lab-14

#	Purpose	Prompt
1	Share	After T01-T08 pass, share Lumina HR Policy Agent with one named test user (Can chat) who already has access to the knowledge files.
2	Enable	Create an Excel tracker with User, Role, Practice test, Evidence, Defect, Owner, Retest and Status; do not prefill completion.

Test It

Check	Expected result
Gate	All blocking retrieval, privacy and approval tests pass before sharing.
Sharing	Named users only, with Can chat; knowledge access verified.
Tracker	Actual practice evidence, defect owner and retest visible.
Lifecycle	Owners, review trigger and rollback assigned.

Checkpoint

If you fell behind, use data/checkpoints/Lumina_Verified_Checkpoint.xlsx and data/checkpoints/Lumina_Verified_Snapshot.docx. Record checkpoint used in Prompt_Log; then perform this lab, rather than claiming the checkpoint as your output.

Troubleshooting

If this happens	Fix
Copilot cannot find the source	Use the app file picker to select the actual OneDrive file. A typed local path or a different app chat is not shared context. If needed copy only the verified snapshot into the current app.
A total disagrees with Control	Clear dashboard filters to All, check table extent and duplicate IDs, recalculate, then compare definitions and reporting date. Reconcile before continuing.
The named feature is missing	Confirm the correct assigned account, English display language and app version. Use the stated manual practice route; record feature unavailable. This is not evidence that a native skill ran.

Challenge

Write one new employee HR question the handbook does not answer, run it and explain which instruction, Skill rule or knowledge boundary controlled the response.

Reflection

Which evidence proves the output is correct, and which decision still needs a person?
