Lab 10: Refine and Present the HR Service Decision Deck

Topic 3 · 30 minutes · v9.3 · 20 October 2026

Refine the management deck using the same custom skill and reviewed dashboard evidence. Improve hierarchy, consistency and speaker notes, test the story in a short rehearsal, and prepare a reviewed Outlook handoff draft. The final pack preserves the distinction between a static presentation snapshot, a refreshable dashboard and a manager's unmade decision.

Learning outcome: LO3: evaluate Teams, Outlook and Microsoft 365 opportunities through a verified dashboard-to-presentation workflow.

Expected outcome: Lumina_HR_Management_Final.pptx/PDF, a rehearsal record, final evidence register and unsent Outlook handoff draft with accurate artifact links.

Files

- Instruction PDF
- Copy-ready prompts
- `data/Lumina_HR_Cases.xlsx` — synthetic Lumina source
- `data/templates/` — learner starting templates
- `data/checkpoints/` — clearly labelled rejoin evidence
- `data/templates/Opportunity_Evaluation.csv` — LO3 Outlook and Teams evaluation checkpoint
- `data/Lumina_Teams_Meeting_Record.txt` — Synthetic Teams meeting evidence

Prerequisites

- Microsoft 365 account with Copilot available in Word, Excel, PowerPoint and Outlook. Availability depends on the assigned licence and tenant settings; confirm access with the trainer before class.
- Desktop Excel on Windows or Mac is recommended; save working copies to your assigned OneDrive course folder with AutoSave on. Do not overwrite the supplied input.
- Download this whole lab folder. All files are synthetic; Lumina-HR-v9 is your own learner output folder.
- Lab 9 management draft, reviewed presentation brief and evidence register.

Steps

Step 1. Open your Lab 9 draft and save as Lumina_HR_Management_Final.pptx. Rejoin only if necessary using data/checkpoints/Lumina_HR_Management_Example.pptx and snapshot; review and adapt its supplied example charts and narrative against the verified snapshot. Open the same reviewed brief in the file picker; confirm native skill or label manual practice.

Step 2. Ask the skill to audit before editing. It should report crowded slides, weak evidence, missing labels and inconsistent scope. Review the list yourself against the evidence register; styling changes must never change values.

PROMPT — copy and adapt

```
POWERPOINT COPILOT:
@hr-case-reporting Audit this eight-slide deck against the selected verified Lumina brief.
List inaccurate figures, ambiguous units, date/scope omissions, unsupported causal or approval
wording, dense text and weak hierarchy. Propose corrections; do not change values or source
facts.
```

Step 3. Apply only the reviewed corrections. Keep white/navy/blue with teal highlights, one main message, readable labels, consistent chart formats and source notes. Ask for concise speaker notes; check that notes do not introduce new numbers or promise assignment approvals.

PROMPT — copy and adapt

```
POWERPOINT COPILOT:
@hr-case-reporting Apply the reviewed design and wording corrections to the existing eight slides. Improve hierarchy and whitespace, make titles claim-led, retain accurate figures and charts, and add 45-second speaker notes per slide. Separate observed findings from proposed actions and end with the decision requested. Preserve the baseline date/scope; do not duplicate slides.
```

Step 4. Use Slide Show to inspect at presentation size. Run a five-minute rehearsal with a partner or PowerPoint Rehearse with Coach if available. Ask the partner to identify the reporting date, highest-priority evidence and decision requested. Record one actual change in data/templates/Rehearsal_Log.csv; do not fabricate feedback.

PROMPT — copy and adapt

```
POWERPOINT COPILOT:
Using only this Lumina Living decision deck, propose three rehearsal questions an HR manager could ask about overdue cases, HR officer capacity and proposed priorities. Suggest where the existing evidence supports an answer and where it remains UNKNOWN. Do not invent partner feedback or alter the evidence.
```

Step 5. Export File > Export or Save As > PDF. Open the PDF and verify eight pages, readable charts and all visible values. Compare PPTX, PDF, Word brief and dashboard against the evidence register. Keep the source workbook with All filters and the archived refresh-test copy separately.

Step 6. Open Outlook and create a draft to hr.manager@example.invalid. Provide the reviewed brief and the actual OneDrive links to the dashboard/deck. Ask Copilot to draft a handoff email; it may not invent shared links or claim a sent attachment. Keep the email unsent and save a local reviewed TXT copy.

PROMPT — copy and adapt

```
OUTLOOK COPILOT:
Draft a short Lumina management handoff email using this verified brief and the links I provide. State the 30 September 2026 baseline scope, headline findings, proposed actions and decision required. Explain that the PowerPoint/PDF is a static snapshot while the Excel dashboard is interactive. Leave missing links UNKNOWN. Do not claim approval or send the draft.
```

Step 7. Complete data/templates/Final_Handoff_Checklist.csv: workbook source and controls, working filters, sandbox refresh proof, skillv2 installation/manual record, eight-slide PPTX/PDF, reviewed notes, evidence register and unsent draft. Record the exact filenames and your actual checks. Save the final pack in Lumina-HR-v9.

PROMPT — copy and adapt

```
WORD COPILOT:
Review the final Lumina Living handoff evidence I supply: baseline workbook, refresh-test record, skill v2, eight-slide deck and PDF, brief, source register and unsent email draft. Return a completeness checklist with verified evidence and missing items UNKNOWN. Confirm every artifact uses the same baseline date/scope; never claim approval, submission or sending.
```

Step 8. Use Lumina_Email_Thread.txt and Lumina_Teams_Meeting_Record.txt to complete both rows in Opportunity_Evaluation.csv: pain point, proposed process, value measure, readiness evidence, inclusion/risk/control and human approval.

Verification

- **Presentation integrity:** Eight slides and eight PDF pages; visible figures agree with verified register.
- **Professional delivery:** Readable chart labels, consistent design, evidence-specific notes and actual rehearsal improvement.
- **Final continuity:** Baseline dashboard, brief, deck and unsent draft agree; static snapshot stated.
- **Decision boundary:** No real email sent or HR case reassigned; proposed actions remain proposed.
- **LO3 checkpoint:** Outlook and Teams rows use supplied evidence, observable value, readiness, risk/control and a human gate.

Expected Outcome

Lumina_HR_Management_Final.pptx/PDF, a rehearsal record, final evidence register and unsent Outlook handoff draft with accurate artifact links.

Checkpoint

If you fell behind, use data/checkpoints/Lumina_Verified_Checkpoint.xlsx and data/checkpoints/Lumina_Verified_Snapshot.docx. Record checkpoint used in Prompt_Log; then perform this lab, rather than claiming the checkpoint as your output.

Troubleshooting

If this happens	Fix
Copilot cannot find the source	Use the app file picker to select the actual OneDrive file. A typed local path or a different app chat is not shared context. If needed copy only the verified snapshot into the current app.
A total disagrees with Control	Clear dashboard filters to All, check table extent and duplicate IDs, recalculate, then compare definitions and reporting date. Reconcile before continuing.
The named feature is missing	Confirm the correct assigned account, English display language and app version. Use the stated manual practice route; record feature unavailable. This is not evidence that a native skill ran.

Challenge

Repeat the task for one different department and explain how the filter scope changes the result. Keep the original verified output.

Reflection

Which evidence proves the output is correct, and which decision still needs a person?

Data note

Lumina Living Pte Ltd and all of its employees, HR cases and HR policies are fictional. Use the verified 120-case baseline and fixed reporting date 30 September 2026. Current case owners are evidence; proposals are not approved. The HR agent answers from approved knowledge only and never approves requests, sends messages or reveals another employee's data.
